Assessing the Youthful Offender Aug 23 2020 Our society's preoccupation with crime and fear of crime appears to have shifted its focus to the juvenile offender. Both electronic and print media continuously warn us that juvenile offenders are increasingly younger and more virulent. The demographics of our population suggest that there will only be more juvenile offenders to fear in the near future. All of these concerns arise in a social climate that is characterized by an ever increasing demand for stronger retributive measures against the offender. The belief that only harsh justice will protect us from the ravages of juveniles has become dominant. Increasingly, perceptions and politics, rather than scientific data, dominate policy making with regard to youthful offenders. In *Assessing the Youthful Offender: Issues and Techniques*, Robert D. Hoge and D. A. Andrews make a restrained, rational, and ultimately persuasive argument for the use of standardized psychological assessments in the effective management of youth within juvenile justice systems. They clarify how what we already know about the cause and management of youthful criminal activity can be incorporated into standardized testing and that the information obtained from testing can improve the administration of criminal justice. Moreover, this information is useful whatever the theoretical biases of those who administer the justice system. The efficiency of policies of either retribution, deterrence, or rehabilitation is only enhanced by reliance on data.

Legal Risks in EU Law Nov 13 2019 This book takes a completely new and innovative approach to analysing the development of EU law. Within the framework of different important areas of EU law, such as the internal market, consumer protection law, social law, investment law, environment law, migration law, legal translation and terminology, it examines the Union's approach to the regulation and management of legal risks. Over the years, the Union has come to a point where it is becoming increasingly difficult to justify its authority to regulate in various areas of law. In managing legal risks deriving from the diversity of Member States' laws, which create barriers to trade and hinder the Union's economy, the Union itself has actually produced new legal risks that now have to be addressed. This failure on the part of EU institutions to manage legal risks has contributed to legal uncertainty for actors operating on the internal market. This book intends to contribute to the Union's smoother functioning and continuing development by proposing effective concrete solutions for managing the legal risks distorting the development of various areas of EU law. It pursues an innovative and effective approach to identify legal risks, their causes at the EU level and their impacts on the functioning of the Union and its Member States. By presenting new approaches in this context, the first book on legal risk management in the EU will actively promote the improvement of the EU lawmaking process and the application of EU law in practice.

manual contains the complete operating instructions and procedures for UH-60A, UH-60Q, UH-60L, and EH-60A helicopters. The primary mission of this helicopter is that of tactical transport of troops, medical evacuation, cargo, and reconnaissance within the capabilities of the helicopter. The observance of limitations, performance, and weight and balance data provided is mandatory. The observance of procedures is mandatory except when modification is required because of multiple emergencies, adverse weather, terrain, etc. Your flying experience is recognized and therefore, basic flight principles are not included. IT IS REQUIRED THAT THIS MANUAL BE CARRIED IN THE HELICOPTER AT ALL TIMES.

A Closer Examination of Applicant Faking Behavior Mar 18 2020 The faking of personality tests in a selection context has been perceived as somewhat of a nuisance variable, and largely ignored, or glossed over by the academic literature. Instead of examining the phenomenon many researchers have ignored its existence, or trivialized the impact of faking on personality measurement. The present volume is a much needed, timely corrective to this attitude. In a wide range of chapters representing different philosophical and empirical approaches, the assembled authors demonstrate the courage to tackle this important and difficult topic head-on, as it deserves to be. The writers of these chapters identify two critical concerns with faking. First, if people fake their responses to personality tests, the resulting scores and the inferences drawn from them might become invalid. For example, people who fake their responses by describing themselves as diligent and prompt might earn better conscientiousness scores, and therefore be hired for jobs requiring this trait that in fact they might not perform satisfactorily. Second, the dishonesty of the faker might itself be a problem, separate from its effect on a particular score. Someone who lies on a pre-employment test might also lie about the hours he or she works, or how much cash is in the till at the end of the shift. Worse, these two problems might exacerbate each other: a dishonest applicant might get higher scores on the traits the employer desires through his or her lying, whereas the compulsively honest applicant might get low scores as an ironic penalty for being honest. Outcomes like these harm employers and applicants alike. The more one delves into the complexities of faking, as the authors of the chapters in this volume do so thoroughly and so well, the more one will recognize that this seemingly specialized topic ties directly to more general issues in psychology. One of these is test validity. The bottom-line question about any test score, faked or not, is whether it will predict the behaviors and outcomes that it is designed to predict. As Johnson and Hogan point out in their chapter, the behavior of someone faking a test is a subset of the behavior of the person in his or her entire life, and the critical research question concerns the degree to which and manner in which behavior in one

domain generalizes to behavior in other domains. This observation illuminates the fact that the topic of faking is also a key part of understanding the relationship between personality and behavior. The central goal of theoretical psychology is to understand why people do the things they do. The central goal of applied psychology is to predict what someone will do in the future. Both of these goals come together in the study of applicant faking.

Measures of Personality and Social Psychological Constructs Mar 10 2022

Measures of Personality and Social Psychological Constructs assists researchers and practitioners by identifying and reviewing the best scales/measures for a variety of constructs. Each chapter discusses test validity, reliability, and utility. Authors have focused on the most often used and cited scales/measures, with a particular emphasis on those published in recent years. Each scale is identified and described, the sample on which it was developed is summarized, and reliability and validity data are presented, followed by presentation of the scale, in full or in part, where such permission has been obtained. Measures fall into five broad groups. The emotional disposition section reviews measures of general affective tendencies, and/or cognitive dispositions closely linked to emotion. These measures include hope and optimism, anger and hostility, life satisfaction, self-esteem, confidence, and affect dimensions. Emotion regulation scales go beyond general dispositions to measure factors that may contribute to understanding and managing emotions. These measures include alexithymia, empathy, resiliency, coping, sensation seeking, and ability and trait emotional intelligence. The interpersonal styles section introduces some traditional social–psychological themes in the context of personality assessment. These measures include adult attachment, concerns with public image and social evaluation, and forgiveness. The vices and virtues section reflects adherence to moral standards as an individual characteristic shaped by sociocultural influences and personality. These measures include values and moral personality, religiosity, dark personalities (Machiavellianism, narcissism, and subclinical psychopathy), and perfectionism. The sociocultural interaction and conflict section addresses relationships between different groups and associated attitudes. These measures include cross-cultural values, personality and beliefs, intergroup contact, stereotyping and prejudice, attitudes towards sexual orientation, and personality across cultures. Encompasses 25 different areas of psychology research Each scale has validity, reliability info, info on test bias, etc Multiple scales discussed for each construct Discussion of which scales are appropriate in which circumstances and to what populations Examples of scales included

Psychological Testing Aug 03 2021 This book is an introductory text to the field of psychological testing primarily suitable for undergraduate students in psychology, education, business, and related fields. This book will also be of

interest to graduate students who have not had a prior exposure to psychological testing and to professionals such as lawyers who need to consult a useful source. Psychological Testing is clearly written, well-organized, comprehensive, and replete with illustrative materials. In addition to the basic topics, the text covers in detail topics that are often neglected by other texts such as cross-cultural testing, the issue of faking tests, the impact of computers and the use of tests to assess positive behaviors such as creativity.

New Zealand National Bibliography Jun 20 2020

Vestal Fire Feb 26 2021 Stephen Pyne has been described as having a consciousness "composed of equal parts historian, ecologist, philosopher, critic, poet, and sociologist." At this time in history when many people are trying to understand their true relationship with the natural environment, this book offers a remarkable contribution--breathhtaking in the scope of its research and exhilarating to read. Pyne takes the reader on a journey through time, exploring the terrain of Europe and the uses and abuses of its lands as well as, through migration and conquest, many parts of the rest of the world. Whether he is discussing the Mediterranean region, Russia, Scandinavia, the British Isles, central Europe, or colonized islands; whether he is considering the impact of agriculture, forestry, or Enlightenment thinking, the author brings an unmatched insight to his subject. Vestal Fire takes its title from Vesta, Roman goddess of the hearth and keeper of the sacred fire on Mount Olympus. But the book's title also suggests the strengths and limitations of Europe's peculiar conception of fire, and through fire, of its relationship to nature. Between the untamed fire of the wilderness and the tended fire of the hearth lies a never-ending dialectic in which human beings struggle to control natural forces and processes that in fact can sometimes be directed but never wholly dominated or contained.

The Role of Constructs in Psychological and Educational Measurement

Jan 16 2020 This volume is comprised of papers presented at an ETS conference in 1997. It reviews insights of leading authorities regarding cognition and personality as domains of human functions to provide groundwork for education reforms.

Manuals of Engineering Practice Nov 25 2020

Handbook of Individual Differences in Social Behavior Oct 25 2020 How do individual differences interact with situational factors to shape social behavior? Are people with certain traits more likely to form lasting marriages; experience test-taking anxiety; break the law; feel optimistic about the future? This handbook provides a comprehensive, authoritative examination of the full range of personality variables associated with interpersonal judgment, behavior, and emotion. The contributors are acknowledged experts who have conducted influential research on the constructs they address. Chapters discuss how each personality attribute is conceptualized and assessed, review

the strengths and limitations of available measures (including child and adolescent measures, when available), present important findings related to social behavior, and identify directions for future study.
