With carbon farming, agriculture ceases to be part of the climate problem and becomes a critical part of the solution Agriculture is rightly blamed as a major culprit of our climate crisis. But in this groundbreaking new book, Eric Toensmeier argues that agriculture—specifically, the subset of practices known as “carbon farming”—can, and should be, a linchpin of a global climate solutions platform. Carbon farming is a suite of agricultural practices and crops that sequester carbon in the soil and in aboveground biomass. Combined with a massive reduction in fossil fuel emissions—and in concert with adaptation strategies to our changing environment— carbon farming has the potential to bring us back from the brink of disaster and return our atmosphere to the “magic number” of 350 parts per million of carbon dioxide. Toensmeier’s book is the first to bring together these powerful strategies in one place, including in-depth analysis of the available research and, where research is lacking, a discussion of what it will take to get us there. Carbon farming can take many forms. The simplest practices involve modifications to annual crop production. Although many of these modifications have relatively low sequestration potential, they are widely applicable and easily adopted, and thus have excellent potential to mitigate climate change if practiced on a global scale. Likewise, grazing systems such as silvopasture are easily replicable, don’t require significant changes to human diet, and—given the amount of agricultural land worldwide that is devoted to pasture—can be important strategies in the carbon farming arsenal. But by far, agroforestry practices and perennial crops present the best opportunities for sequestration. While many of these systems are challenging to establish and manage, and would require us to change our diets to new and largely unfamiliar perennial crops, they also offer huge potential that has been almost entirely ignored by climate crusaders. Many of these carbon farming practices are already implemented globally on a scale of millions of hectares. These are not minor or marginal efforts, but win-win solutions that provide food, fodder, and feedstocks while fostering community self-reliance, creating jobs, protecting biodiversity, and repairing degraded land—all while sequestering carbon, reducing emissions, and ultimately contributing to a climate that will remain amenable to human civilization. Just as importantly to a livable future, these crops and practices can contribute to broader social goals such as women’s empowerment, food sovereignty, and climate justice. The Carbon Farming Solution does not present a prescription for how cropland should be used and is not, first and foremost, a how-to manual, although following up on references in a given section will frequently provide such information. Instead, The Carbon Farming Solution is—at its root—a toolkit. It is the most complete collection of climate-friendly crops and practices currently available. With this toolkit, farmers, communities, and governments large and small, can successfully launch carbon farming projects with the most

appropriate crops and practices to their climate, locale, and socioeconomic needs. Toensmeier's ultimate goal is to place carbon farming firmly in the center of the climate solutions platform, alongside clean solar and wind energy. With *The Carbon Farming Solution*, Toensmeier wants to change the discussion, impact policy decisions, and steer mitigation funds to the research, projects, and people around the world who envision a future where agriculture becomes the protagonist in this fraught, urgent, and unprecedented drama of our time. Citizens, farmers, and funders will be inspired to use the tools presented in this important new book to transform degraded lands around the world into productive carbon-storing landscapes. A groundbreaking, “timely and well-written” (Booklist, starred review) guide to addiction from a psychiatrist and public health doctor, offering practical, proven solutions for individuals, families, and communities dealing with substance use and abuse. Written with warmth, accessibility, and vast authority, *The Addiction Solution* is a practical guide through the world of drug use and abuse and addiction treatment. Here, Lloyd I. Sederer, MD, brings together scientific and clinical knowledge, policy suggestions, and case studies to describe our current drug crisis and establish a clear path forward to recovery and health. In a time when so many people are affected by the addiction epidemic, when 142 people die of overdoses every day in the United States, principally from opioids, Sederer's decades of wisdom and clinical experience are needed more than ever before. With a timely focus on opioids, Sederer takes us through the proven essentials of addiction treatment and explains why so many of our current policies, like the lingering remnants of the War on Drugs, fail to help drug users, their families, and their wider communities. He identifies a key insight, often overlooked in popular and professional writing about addiction and its treatment: namely, that people who use drugs do so to meet specific needs, and that drugs may be the best solution those people currently have. Writing with generosity and empathy about the many Americans who use illicit and prescribed substances, Sederer lays out specific, evidence-based, researched solutions to the prevention and problems of drug use, including exercise, medications, therapy, recovery programs, and community services. “Comprehensive...well-informed and accessible” (Kirkus Reviews), *The Addiction Solution* provides invaluable help, comfort, and hope. A real-world solution for parental leave that promotes gender equality at work and at home What do Papua New Guinea, Suriname, and the United States have in common? These three nations are the only ones that do not offer some form of parental leave to new parents. The US lags far behind the rest of the world on this important issue, raising questions about our commitment to gender equality and the welfare of our families. In *Fixing Parental Leave*, Gayle Kaufman takes an in-depth look at parental leave policies in the US, the UK, and Sweden, and evaluates the benefits and drawbacks of leave policies in each country. She finds that there is more to parental leave policies than whether a country provides time off around the birth or adoption of a child. While most policies are designed to help women return to work, this is only half of the puzzle. The second half requires men to be meaningful partners by encouraging them to take equal time at home. Ultimately, Kaufman arrives at a rational solution that will promote gender equity through a policy that enables parents at companies of all sizes to spend six months with their new child. And it is well understood that creating a new business and optimizing an already existing one are two fundamentally different management challenges. The real problem for leaders is doing both, simultaneously. How do you meet the performance requirements of the existing business—one that is still thriving—while dramatically reinventing it? How do you envision a change in your current business model before a crisis forces you to abandon it? Innovation guru Vijay Govindarajan expands the leader's innovation tool kit with a simple and proven method for allocating the organization's energy, time, and resources—in balanced measure—across what he calls "the three boxes": • Box 1: The present—Manage the core business at peak profitability • Box 2: The past—Abandon ideas, practices, and attitudes that could inhibit innovation • Box 3: The future—Convert breakthrough ideas into new products and businesses The three-box framework makes leading innovation easier because it gives leaders a simple vocabulary and set of tools for managing and measuring these different sets of behaviors and activities across all levels of the organization. Supported with rich company examples—GE, Mahindra & Mahindra, Hasbro, IBM, United Rentals, and Tata Consultancy Services—and testimonies of leaders who have successfully used this framework, this book solves once and for all the practical dilemma of how to align an organization on the critical but competing demands of innovation. At the same time, a child named Jonas Salk was born....
