Aramaic was used in Mel Gibson's film "The Passion of the Christ" to make the film as realistic and accurate as possible. This New Testament will surprise and thrill the reader with its power and inspiration coming from the words of "Yeshua" ("Jesus" in ancient Aramaic) as He originally spoke them, in a literal and readable English rendering. 659 pages in 6x9" paperback. The best book ever written in the field of clandestine chemistry has just gotten better in a new 8th edition. I have trained the champions of the field of clandestine chemistry for over 20 years, and this book gives the new techniques required for this constantly evolving field. I have uncovered a very easily done and supplied method for cooking your own ephedrine and pseudoephedrine from health food store and hardware store materials. This completely eliminates the need to show ID and

buy adulterated and expensive pills containing these materials. I have also reconfigured older recipes to make use of the weaker or polluted materials now commonly found on hardware store shelves. This 8th edition shows the futility of politically motivated attempts by pandering politicians to regulate the private lives of individuals. We see teaching mathematics as a form of storytelling, both when we present in a classroom and when we write materials for exploration and learning. The goal is to explain to you in a captivating manner, at the right pace, and in as clear a way as possible, how mathematics works and what it can do for you. We find mathematics to be intriguing and immensely beautiful. We want you to feel that way, too. June 14-15, 2018
