The first novel in the Poseidon's Children series from the acclaimed author of the Revelation Space series. One hundred and fifty years from now, Africa has become the world's dominant technological and economic power. Crime, war, disease and poverty have been practically eliminated. The Moon and Mars are settled, and colonies stretch all the way out to the edge of the solar system. And Ocular, the largest scientific instrument in history, is about to make an epochal discovery... Geoffrey Akinya wants only one thing: to be left in peace, so that he can continue his long-running studies into the elephants of the Amboseli basin. But Geoffrey's family, which controls the vast Akinya business empire, has other plans for him. After the death of his grandmother Eunice—the erstwhile space explorer and entrepreneur—something awkward has come to light on the Moon, so Geoffrey is dispatched there to ensure the family name remains untarnished. But the secrets Eunice died with are about to be revealed—secrets that could change everything...or tear this near utopia apart. This story is not part of the Revelation Space series. It was developed from notes for an unwritten novel and maybe one day that novel will be completed, for we need to know the fate of the Earth. This story presents one of the more unusual apocalyptic ideas. Excerpt from Artemisia, 1982-1983 Tuesday, October 12 asun brought steel breeze and Kansas together in concert in the umr old gym. It was a great way to end the three-day weekend, which had been declared by the governor. The performance was opened by rising band steel breeze. Steel breeze debuted at last year's winter Carnival at Alpine Meadows. The group has since received national recognition for their top-ten single, You Don't Want Me Anymore. Steel breeze played their popular rock over an hour then cleared out for Kansas. The first half of the show was mostly songs off their more recent albums. The music was great, and the light show made it even better. The lights and music were synchronized in tempo and tone the effect was fantastic. Heavy rock was the rule until midway through their performance when keyboar dist-songwriter Kerry Lingren changed the pace with an acoustical set. This set included their hit ballad Dust in the Wind, and smash hit Hold On. Following this break, the group returned to heavy rock until the end of the concert. They finished strong with Point of Know Return, and all-time great Wayward Son.

The steel breeze-kansas Concert marked the first time beer had been served in the gym and probably the last. Al though the students netted over problems with security and clean-up indicate that beer will probably not be served in the gym again. Despite such technical problems, steel breeze and kansas were crowd pleasers giving spectators all they could have asked for and more. Alastair Reynolds revolutionized the science fiction genre with his critically-acclaimed Revelation Space novels. Now, the award-winning author presents a future of technological wonders—from every era... In a far-distant future, Spearpoint, the last human city, is a vast, atmosphere-piercing spire. Clinging to its skin are the zones: semiautonomous city-states, each of which enjoys a different—and rigidly enforced—level of technology. Following a botched infiltration mission, enforcement agent Quillon has been living incognito, working as a pathologist in a morgue. But when a near-dead angel drops onto his dissection table, his world is wrenched apart. For the angel is a winged posthuman from Spearpoint's Celestial Levels. And with the dying body comes bad news: Quillon must leave his home and travel into the cold and hostile lands beyond Spearpoint's base. But he can neither imagine how far the journey will take him—nor comprehend how much is at stake... In 1995, a disgraced former LA Times reporter, JC Wyatt, who now works for a supermarket tabloid, investigates a story about a Professor, who has created a formula that prevents nuclear reactions from taking place. Believing this might be something big, and lacking credibility, he tries to enlist his former girlfriend, and current Pulitzer prize winning LA times journalist, Tracey Holmes to investigate with him. Chased by a hardnosed FBI agent who wants them to drop the investigation, as well as Russian and Israeli spies, JC and Tracey start to believe there may be something to this formula. The only way to prove that the formula works is to use it on an upcoming protest filled Nuclear Bomb test in the Nevada desert. Connecting with Dr. Judith Stanton, a former Nuclear scientist, and current Nuclear test protestor, JC and Tracey pursue proof that the formula works. Provided the formula in aerosol form by the Professor, the three of them use the cover of the thousands of people protesting the Nuclear test, to infiltrate the Air Force base, and make their way to the Nuclear test site. Climbing down an air shaft to the bomb test, they are confronted by the FBI agent who told them to give it up, and now locks them into the bomb test area, where their lives depend on the formula working. In the third book of the legendary Revelation Space trilogy, the last remnants of humanity realize that forging an alliance with a greater and even more mysterious alien force may be their only chance for survival. The Inhibitors were designed to eliminate any life form reaching a certain level of intelligence -- and they've targeted Humanity. War veteran Clavain and a ragtag group of refugees have fled into hiding. Their leadership is faltering, and their situation is growing more desperate. But their little colony has just received an unexpected visitor: an avenging angel with the power to lead mankind to safety -- or draw down its darkest enemy. And as she leads them to an apparently insignificant moon light-years away, it begins to dawn on Clavain and his companions that to beat one enemy, it may be necessary to forge an alliance with something much worse . . . "Absolution Gap is a good as it gets, and should solidify Alastair Reynolds' reputation as one of the best hard SF writers in the field." -- SF Site

BOOK DESCRIPTION A short essay on the music of Pink Floyd. This is not just a purely biographical text or a general overview of the band from London. This is a work focused on the study of a specific composition, which restricts the scope for one of the most emblematic suite songs of Pink Floyd's discography: Shine On, You Crazy Diamond. It is a starting point for a reflection on popular music in general, compared to the music of all time. Through a detailed analysis of the harmonic and melodic aspects of the first 5 parts of the song (Parts I-V), described in a virtual journey way, this work aims to testify to the compositional genius of Pink Floyd (with a whole chapter devoted to guitarist David Gilmour) which is empowered to gather within itself, today, all the key elements of the entire musical stylistic heritage of the last 60 years of popular music worldwide. Starting with a brief introduction to their artistic life and a historiographical record of the band, the text quickly turns into a work of research and study, based on three aspects: formal, compositional and evocative/emotional. It is a stimulating basis for study and research. For musicians (especially guitarists), for committed students or already professionals who wish to go deeper in the knowledge of the musical world of these artists, whether they want in a more general way, compare with other analysis of the composition made previously or subsequently. It is a useful tool for study and for a more conscious musical and less purely imitative performance. A reading, finally, that although containing different complex parts from the viewpoint of the musical technique is also addressed in large extent to the avid reader, although not a musician, allowing him to discover the immense, fascinating and complex "parallel world" that exists behind all that was listened to in life and is listened to every day... The Gates were there on Phobos when mankind first arrived. Inert, unyielding, impossibly alien constructs, for twenty years they sat lifeless, mute testaments to their long-vanished creators, their secrets hidden. Then one day, they sprang to life... Meet Corporal Flynn Taggart, United States Marine Corps; serial number 888-23-9912. He's the best warrior the twenty-first century has to offer, which is a damn good thing. Because Flynn Taggart is all that's standing between the hell that just dropped in on Mars and an unsuspecting planet Earth... Bill, the Galactic Hero is written by Harry Harrison who is also the author of Deathworld, Make Room! Make Room! (filmed as Soylent Green), the popular Stainless Steel Rat books, and many other famous works of SF. "Simply the funniest science fiction book ever written."--New York Times bestselling author Terry Pratchett At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied. The gripping sequel to the Locus award winning science fiction adventure, Revenger, tells a story of obsession and betrayal as two sisters hunt for the greatest treasure in the universe. Adrana and Fura Ness have finally been reunited, but both have changed beyond recognition. Once desperate for adventure, now Adrana is haunted by her enslavement on the feared pirate Bosa Sennen's ship. And rumors of Bosa Sennen's hidden cache of treasure have ensnared her sister, Fura, into single-minded obsession. Neither is safe; because the galaxy wants Bosa Sennen dead and they don't care if she's already been killed. They'll happily take whoever is flying her ship. Shadow Captain is a desperate story of cursed ships, vengeful corporations, and alien artifacts, of daring escapes and wealth beyond imagining . . . and of betrayal. Emperor Elend Venture, having survived only to become a Mistborn himself, struggles to find clues by the Lord Ruler that will save his world, while a guilt-consumed Vin takes on a task of ending the cosmic power of the Ruin mystic force. 25 chilling short stories by outstanding female writers. Women have always written exceptional stories of horror and the supernatural. This anthology aims to showcase the very best of these, from Amelia B. Edwards's 'The Phantom Coach', published in 1864, through past luminaries such as Edith Wharton and Mary Elizabeth Braddon, to modern talents including Muriel Gray, Sarah Pinborough and Lilith Saintcrow. From tales of ghostly children to visitations by departed loved ones, and from heart-rending stories to the profoundly unsettling depiction of extreme malevolence, what each of these stories has in common is the effect of a slight chilling of the skin, a feeling of something not quite present, but nevertheless there. If anything, this showcase anthology proves that sometimes the female of the species can also be the most terrifying . . .

ABOUT THE BOOK Pink Floyd's progressive and psychedelic rock sound, most famously featured on concept albums like The Dark Side of the Moon, Wish You Were Here and The Wall, have given them astounding critical and commercial success. When lead songwriter Syd Barrett succumbed to drugs and mental illness and left the band, the subsequent power struggle between artistically controlling frontman Roger Waters and guitarist David Gilmour led to one of the most famous feuds in rock-n-roll history. The band was

originally composed of Roger Waters (bass), Nick Mason (drums) and Richard Wright (piano/keyboard), who all met while studying at Regent Street Polytechnic in London. 17-year-old Roger Syd Barrett, a childhood friend of Waters, joined the group in 1964. Barrett named the group Pink Floyd by combining the names of two blues musicians, Pink Anderson and Floyd Council. MEET THE AUTHOR Sarah Bruhns graduated from San Francisco State University with a degree in Creative Writing. She is a long-time volunteer at 826 Valencia, where she designed a comic book creation class, a magical realism workshop, and lessons for the English Language Learners Summer Series. Her favorite activities include hiking around the city, uncovering new eating experiences, and cooking with wine. She can be found at Borderlands Cafe in San Francisco, drinking way too much coffee. EXCERPT FROM THE BOOK The Wall is a sprawling rock opera that explores abandonment, conformity, isolation and emotional numbness. The album's lyrics are cyclical as a reflection of inevitability a sentence (Isn't this where) begins at the very end of the album, and is finished (we came in?) at the very beginning. The story is arranged around a character named Pink, who loses his father in war, is tormented at school, and eventually as a rock star, builds a literal and figurative wall to protect himself from the outside world. During stage shows, the band played behind a gradually constructed wall, and giant inflatable pigs floated above the stadium. The band performed The Wall only 29 times in New York, Los Angeles and London. CHAPTER OUTLINE Quicklet on the Best Pink Floyd Songs: Lyrics and Analysis + About Pink Floyd + We Don't Need No Thought Control + You Have Found the Secret Message + The Wall Was Too High as You Can See + ...and much more The Best Pink Floyd Songs: Lyrics and Analysis In the second book of The Inhibitor Trilogy, Alastair Reynolds pushes the boundaries of science fiction and "confirms his place among the leaders of the hard-science space-opera renaissance" (Publishers Weekly). Late in the twenty-sixth century, the human race has advanced enough to accidentally trigger the Inhibitors -- alien killing machines designed to detect intelligent life and destroy it. The only hope for humanity lies in the recovery of a secret cache of doomsday weapons -- and a renegade named Clavain who is determined to find them. But other factions want the weapons for their own purposes -- and the weapons themselves have another agenda altogether . . . The thrilling finale to the Revenger Trilogy tells a desperate tale of greed, piracy, shadow governments, and ancient secrets that could unravel all of civilization The Ness sisters ran away from home to become the most fearsome pirates in the twenty thousand worlds of the Congregation. They've plundered treasures untold, taken command of their own ship, and made plenty of enemies. But now they're being hunted for crimes they didn't commit by a fleet whose crimes are worse than their own. To stay one step ahead of their pursuers and answer the questions that have plagued them, they'll have to employ every dirty, piratical trick in the book.... Read more by Alastair Reynolds! The Revenger Trilogy: Revenger Shadow Captain Bone Silence Now with over 10 million copies sold, The Mistborn Series has the thrills of a heist story, the twistiness of political intrigue, and the epic scale of a landmark fantasy saga. The impossible has been accomplished. The Lord Ruler -- the man who claimed to be god incarnate and brutally ruled the world for a thousand years -- has been vanquished. But Kelsier, the hero who masterminded that triumph, is dead too, and now the awesome task of building a new world has been left to his young protégé, Vin, the former street urchin who is now the most powerful Mistborn in the land, and to the idealistic young nobleman she loves. As Kelsier's protégé and slayer of the Lord Ruler she is now venerated by a budding new religion, a distinction that makes her intensely uncomfortable. Even more worrying, the mists have begun behaving strangely since the Lord Ruler died, and seem to harbor a strange vaporous entity that haunts her. Stopping assassins may keep Vin's Mistborn skills sharp, but it's the least of her problems. Luthadel, the largest city of the former empire, doesn't run itself, and Vin and the other members of Kelsier's crew, who lead the revolution, must learn a whole new set of practical and political skills to help. It certainly won't get easier with three armies -- one of them composed of ferocious giants -- now vying to conquer the city, and no sign of the Lord Ruler's hidden cache of atium, the rarest and most powerful allomantic metal. As the siege of Luthadel tightens, an ancient legend seems to offer a glimmer of hope. But even if it really exists, no one knows where to find the Well of Ascension or what manner of power it bestows. Oscar was hot and bored on the subway train. Then he saw the Island Lady with a huge basket. "Want to know what's inside?" she asked. And out she brought a cool island breeze, the green Caribbean Sea, good things to eat • a calypso man and music and everyone joined in the fun. A stellar new science fiction adventure from the author who redefined space opera, set in his bestselling Revelation Space universe. For thirty years a tiny band of humans has been sheltering in the caverns of an airless, crater-pocked world called Michaelmas. Beyond their solar system lie the ruins of human interstellar civilization, stalked by a ruthless, infinitely patient cybernetic entity determined to root out the last few bands of survivors. One man has guided the people of Michaelmas through the hardest of times, and given them hope against the wolves: Miguel de Ruyter. When a lone human ship blunders into their system, and threatens to lead the wolves to Michaelmas, de Ruyter embarks on a desperate, near-suicide mission to prevent catastrophe. But an encounter with a refugee from the ship—the enigmatic woman who calls herself only Glass—leads to de Ruyter's world being turned upside down. When life gets complicated, New York Times bestselling author Sherryl Woods proves family—and love—can make all the difference Facing a personal crisis, ambitious and driven Gabriella Castle retreats to the welcoming arms of her family. Everything she's worked for has been yanked out from under her, and she seeks the serenity of her grandmother's home on the North Carolina coast. With difficult decisions to make about her future, the last thing she wants is an unexpected love. Wade Johnson fell for Gabi the first time he saw her. It's not the only time he's found himself in the role of knight in shining armor, but Gabi isn't looking for a rescuer. To get her to stay, Wade will need a whole lot of patience and gentle persuasion...and maybe the soothing sound of wind chimes on a summer breeze. Hamlet is someone eternally at war with the necessity to choose his path. A struggle management experts and business leaders are well-acquainted with. Hamlet is the epitome of the chronically undecided, who has made procrastination, indecisiveness and therefore, inaction, a way of life and of conduct. The heir to the Danish throne's most famous line: "To be or not to be, that is the question", an open declaration of skepticism, is strikingly applicable to managers, and not only them -- as, deep down, Hamlet's story is about each and all of us, regardless of our held position. Eventually, you come to understand that, perhaps, Hamlet is "just" a man, desperately, viciously fighting his destiny. Like we normally do everyday. So, how do we get out of this impasse? Shakespeare's masterpiece will show us the way, we just have to read it carefully, like Beppe Carrella did. From the master of the space opera comes a dark, mind-bending adventure spread across time and space, where Doctor Silas Coade is tasked with keeping his crew safe as they adventure across the galaxy in search of a mysterious artifact. In the 1800s, a sailing ship crashes off the coast of Norway. In the 1900s, a Zepellin explores an icy canyon in Antarctica. In the far future, a spaceship sets out for an alien artifact. Each excursion goes horribly wrong. And on every journey, Dr. Silas Coade is the physician, but only Silas seems to realize that these events keep repeating themselves. And it's up to him to figure out why and how. And how to stop it all from happening again. An "engaging and awe-inspiring"(SF Signal) space opera from the critically-acclaimed author of the Revelation Space series. Six million years ago, at the dawn of the star-faring era, Abigail Gentian fractured herself into a thousand male and female clones, which she

called shatterlings. She sent them out into the galaxy to observe and document the rise and fall of countless human empires. Since then, every two hundred thousand years, they gather to exchange news and memories of their travels. Only there is no Gathering. Someone is eliminating the Gentian line. And now Campion and Purslane -- two shatterlings who have fallen in love and shared forbidden experiences -- must determine exactly who, or what, their enemy is, before they are wiped out of existence . . . Pushing Ice is the brilliant tale of extraordinary aliens, glittering technologies, and sweeping space opera from award-winning science fiction author Alastair Reynolds. 2057. Humanity has raised exploiting the solar system to an art form. Bella Lind and the crew of her nuclear-powered ship, the Rockhopper, push ice. They mine comets. And they're good at it. The Rockhopper is nearing the end of its current mission cycle, and everyone is desperate for some much-needed R & R, when startling news arrives from Saturn: Janus, one of Saturn's ice moons, has inexplicably left its natural orbit and is now heading out of the solar system at high speed. As layers of camouflage fall away, it becomes clear that Janus was never a moon in the first place. It's some kind of machine -- and it is now headed toward a fuzzily glimpsed artifact 260 light-years away. The Rockhopper is the only ship anywhere near Janus, and Bella Lind is ordered to shadow it for the few vital days before it falls forever out of reach. In accepting this mission, she sets her ship and her crew on a collision course with destiny -- for Janus has more surprises in store, and not all of them are welcome. In the conclusion of Alastair Reynolds' epic Poseidon's Children saga, the Akinya family receives an invitation from across the stars—and a last opportunity to redeem their name... Send Ndege... The cryptic message originated seventy light-years away from the planet Crucible, where Ndege Akinya lives under permanent house arrest for her role in the catastrophe that killed 417,000 people. Could it be from her mother, Chiku, who vanished during a space expedition decades earlier? Ndege's daughter, Goma, a biologist, joins the crew of the Travertine, dispatched to Gliese 163 to uncover the source behind the enigmatic message. Goma's odyssey will take her not only into the furthest reaches of space but centuries into her family's past where the answers to the universe's greatest mysteries await... Award-winning author Alastair Reynolds creates "a fascinating hybrid of space opera, police procedural and character study" (Publishers Weekly) with this novel set in the Revelation Space universe. Tom Dreyfus is a Prefect, a law enforcement officer with the Panoply. His beat is the Glitter Band, that vast swirl of space habitats orbiting the planet Yellowstone, the teeming hub of a human interstellar empire spanning many worlds. His current case: investigating a murderous attack against one of the habitats that leaves nine hundred people dead. But his investigation uncovers something far more serious than mass slaughter -- a covert plot by an enigmatic entity who seeks nothing less than total control of the Glitter Band. A collection of eight short stories and novellas in the dark and turbulent world of Alastair Reynolds' Revelation Space universe. Centuries from now, solidarity stretches thin as humanity spreads past the solar system and to the nearest stars. Technology has produced powerful new tools-but lethal risk will always accompany great advancement. And without foresight, opposing groups may fracture multiple worlds. Between the Demarchists and the Conjoiners, the basic right to expand human intelligence-beyond its natural limits-has become a war-worthy cause. Only vast lighthugger starships bind these squabbling colonies together, manned by the panicky and paranoid Ultras. And the hyperpigs just try to keep their heads down. The rich get richer. And everyone tries not to think about the worrying number of extinct alien civilizations turning up on the outer reaches of settled space...because who's to say that humanity won't be next? According to Rosemary Luce, 1968 Mahoningtown, Pennsylvania, was as true as the movie's exaggerations—a flash of technicolored bliss. But under the falling soot of train engines and steel mill stacks her vibrant Italian-American community is riddled with morbid secrets. Eleven-year-old Rosie's curiosity in a mysterious group of men precipitates her discovery of the Italian Mafia. When she gets caught in the Mafia's path she learns that her honorable and honest family has incestuous Mafia ties. And, the golden age of the mob is coming to a self-detonating end. Her struggle to rescue her family from its generational curse begins to blur her own distinctions between corruption and justice, good and evil, sin and saving. In her journey, she discovers the power of friendship, the consequences of evil, and the hard decisions that come with unconditional love. Beyond its elucidation and critique of traditional 'notation-centric' musicology, this book's primary emphasis is on the negotiation and construction of meaning within the extended musical multimedia works of the classic British group Pink Floyd. Encompassing the concept albums that the group released from 1973 to 1983, during Roger Waters' final period with the band, chapters are devoted to Dark Side of the Moon (1973), Wish You Were Here (1975), Animals (1977), The Wall (1979) and The Final Cut (1983), along with Waters' third solo album Amused to Death (1993). This book's analysis of album covers, lyrics, music and film makes use of techniques of literary and film criticism, while employing the combined lenses of musical hermeneutics and discourse analysis, so as to illustrate how sonic and musical information contribute to listeners' interpretations of the discerning messages of these monumental musical artifacts. Ultimately, it demonstrates how their words, sounds, and images work together in order to communicate one fundamental concern, which—to paraphrase the music journalist Karl Dallas—is to affirm human values against everything in life that should conspire against them. The award-winning author of the Revelation Space series continues his Poseidon's Children saga as the next generation of the Akinya family crosses interstellar space seeking humanity's future... Chiku Akinya, great granddaughter of the legendary space explorer Eunice Akinya and heir to the family empire, is just one among millions on a long one way journey towards a planet they hope to call their new home. For Chiku, the journey is a personal one, undertaken to ensure that the Akinya family achieves its destiny among the stars. The passengers travel in huge self-contained artificial worlds—holoships—putting their faith in a physics they barely understand. Chiku's ship is called Zanzibar—and over time, she will discover it contains an awesome secret—one which will lead her to question almost every certainty about her voyage, and its ultimate destiny... A revealing investigation into the life of a reclusive cult genius. Syd Barrett was Pink Floyd's founder, singer, guitarist and principal composer, who left the group in 1968 amidst tales of acid-induced madness. Barrett's brief flash of erratic brilliance is now the stuff of rock legend, and his post-Floyd recordings have become cult classics. Revised in 2006, this book draws on years on research to relate the story of an epic rock tragedy. Critically-acclaimed author Alastair Reynolds creates "a fascinating hybrid of space opera, police procedural and character study"(Publishers Weekly) in this novel in his Revelation Space universe. Tom Dreyfus is a Prefect, a law enforcement officer with the Panoply. His beat is the Glitter Band, that vast swirl of space habitats orbiting the planet Yellowstone, the teeming hub of a human interstellar empire spanning many worlds. His current case: investigating a murderous attack against one of the habitats that leaves nine hundred people dead. But his investigation uncovers something far more serious than mass slaughter—a covert plot by an enigmatic entity who seeks nothing less than total control of the Glitter Band. Following 10 songs you should listen to before you die and the books on Tim Burton and Hayao Miyazaki, Jacopo Caneva's latest work carries out a short, but in-depth study on the concepts of loneliness and nostalgia in Pink Floyd's lyrics, from The Dark Side of the Moon to The Wall. The young writer unveils the common ground of apparently different lyrics: the memory of Syd Barrett, the genius and first leader of the group, the "crazy diamond" who gave the band the name of Pink Floyd, delivering it to myth, disappearing in anonymity after troublesome years. The book is a tribute to the legendary English rock-band and a celebration of the The Endless River, a new album of previously unreleased songs. This highly acclaimed first novel in the Revelation Space universe has redefined the space opera with a staggering journey across vast gulfs of time and space to confront the very nature of reality itself . . . Nine hundred thousand years ago, something annihilated the Amarantin civilization just as it was on the verge of discovering space flight. Now one scientist, Dan Sylveste, will stop at nothing to solve the Amarantin riddle before ancient history repeats itself. With no other resources at his disposal, Sylveste forges a dangerous alliance with the cyborg crew of the starship Nostalgia for Infinity. But as he closes in

on the secret, a killer closes in on him. Because the Amarantins were destroyed for a reason, and if that reason is uncovered, the universe and reality itself could be irrevocably altered . . . "[A] tour de force... Ravishingly inventive." -- Publishers Weekly **A BLACK WIND BLOWS AND LIFE HANGS IN THE BALANCE**. It's been a year since novelist Desmond Carmichael's wife Sandy was brutally murdered. Now, with someone stalking him and his four-year-old son, he fears that the wrong man has been imprisoned for the crime. Sandy's parents and Detective Chuck Fournier have a different fear: that Desmond, despondent over Sandy's death, has become too unstable to raise his own son. To prove them wrong, Desmond must work outside the law to defeat a threat born in the dust of an American wasteland, baptized by fire, and hellbent on riding the winds of karma.
