Beginning Biblical Hebrew Nov 11 2019 Achieving the right balance of amount of information, style of presentation, and depth of instruction in first-year grammars is no easy task. But Mark Futato has produced a grammar that, after years of testing in a number of institutions, will please many, with its concise, clear, and well-thought-out presentation of Biblical Hebrew. Because the teaching of biblical languages is in decline in many

seminaries and universities, Futato takes pains to measure the amount of information presented in each chapter in a way that makes the quantity digestible, without sacrificing information that is important to retain. The book includes exercises that are drawn largely from the Hebrew Bible itself. Fourth printing, 2012.

First Time Analogies May 30 2021 An analogy is a comparison between two things. It points out the similarities between two things that might be different in all other respects. Analogies cause us to think analytically about forms, uses, structures, and relationships. First Time Analogies is the ideal launching pad to start nonreaders on the road to real thinking experiences with these pictorial and symbolic analogies that are both challenging and motivating. The book is divided into four sections that let you introduce analogies in a developmental way. The levels are: recognizing relationships; choosing one item to complete the analogy; given two items, choosing two other items that have the same relationships; and pairing up four items to complete two related pairs. Exercises are presented on worksheets that require circling the correct answer, as well as cutting out pictures and pasting them in the correct spaces. Attractive illustrations will draw students into the engaging exercises. Although they think they are just solving fun puzzles, they will be doing serious thinking and building a basis for future experiences in critical thinking. This is the first in a series of books that introduce analogies at varying difficulties and formats. The other books are Analogies for Beginners, Analogies for the 21st Century,

Thinking Through Analogies, and Advancing Through Analogies. Grades K-2
