Chemical Physics Dec 27 2020 A full understanding of modern chemistry is impossible without quantum theory. Since the advent of quantum mechanics in 1925, a number of chemical phenomena have been explained, such as electron transfer, excitation energy transfer, and other phenomena in photochemistry and photo-physics. Chemical bonds can now be accurately calculated with the help of a personal computer.

Addressing students of theoretical and quantum chemistry and their counterparts in physics, Chemical Physics: Electrons and Excitations introduces chemical physics as a gateway to fields such as photo physics, solid-state physics, and electrochemistry. Offering relevant background in theory and applications, it covers the foundations of quantum mechanics and molecular structure, as well as more specialized topics such as transfer reactions and photochemistry.

Tyrants Jun 01 2021 A TWO-MAN CRUSADE THROUGH MEXICO'S BADLANDS...Will Slater is on the hunt. Three months ago he found a list belonging to drug-slinging gangster Dwayne Griggs. A collection of blackmail, pictures of unspeakable horrors. He's not going to stop until the men in the photos are dead and buried. He's already mown through five of them. The sixth poses a problem. Kian Grant, an ex-televangelist preacher with murky ties to the Boston underworld, knows something's coming. Before Slater can even approach his suburban mansion, Grant is gone, fleeing south over the border to the mountain town of Durango. Slater knows exactly what that means. Cartel ties. Doesn't mean he'll let it slide. If Grant was hoping Slater would let it go, he picked the wrong enemy. Slater enlists the only man willing to help wage war with hordes of soulless killers in a barren land, and together he and Jason King set off in relentless pursuit of a grifter who'll get what's coming...What readers are saying about King & Slater: ★★★★★ - "Slater and King working together is a whole new adventure. Twice as much death and destruction. Lying Oct 13 2019 "The beauty of Lauren Slater's prose is shocking," said Newsday about Welcome to My Country, and now, in this powerful and provocative new book, Slater brilliantly explores a mind, a body, and a life under siege. Diagnosed as a child with a strange illness, brought up in a family given to fantasy and ambition, Lauren Slater developed seizures, auras, neurological disturbances--and an ability to lie. In Lying: A Metaphorical Memoir, Slater blends a coming-of-age story with an electrifying exploration of the nature of truth, and of whether it is ever possible to tell--or to know--the facts about a self, a human being, a life. Lying chronicles the doctors, the tests, the seizures, the family embarrassments, even as it explores a sensitive child's illness as both metaphor and a means of attention-getting--a human being's susceptibility to malady, and to storytelling as an act of healing and as part of the quest for love. This mesmerizing memoir openly questions the reliability of memoir itself, the trickiness of the mind in perceiving reality, the slippery nature of illness and diagnosis--the shifting perceptions and images of who we are and what, for God's sake, is the matter with us. In Lying, Lauren Slater forces us to redraw the boundary between what we know as fact and what we believe we create as fiction. Here a young woman discovers not only what plagues her but also what heals her--the birth of sensuality, her creativity as an artist--in a book that reaffirms how a fine writer can

reveal what is common to us all in the course of telling her own unique story. About Welcome to My Country, the San Francisco Chronicle said, "Every page brims with beautifully rendered images of thoughts, feelings, emotional states." The same can be said about Lying: A Metaphorical Memoir.

Dickens and the Imagined Child Oct 25 2020 The figure of the child and the imaginative and emotional capacities associated with children have always been sites of lively contestation for readers and critics of Dickens. In Dickens and the Imagined Child, leading scholars explore the function of the child and childhood within Dickens's imagination and reflect on the cultural resonance of his engagement with this topic. Part I of the collection examines the Dickensian child as both characteristic type and particular example, proposing a typology of the Dickensian child that is followed by discussions of specific children in Oliver Twist, Dombey and Son, and Bleak House. Part II focuses on the relationship between childhood and memory, by examining the various ways in which the child's-eye view was reabsorbed into Dickens's mature sensibility. The essays in Part III focus upon reading

and writing as particularly significant aspects of childhood experience; from Dickens's childhood reading of tales of adventure, they move to discussion of the child readers in his novels and finally to a consideration of his own early writings alongside those that his children contributed to the Gad's Hill Gazette. The collection therefore builds a picture of the remembered experiences of childhood being realised anew, both by Dickens and through his inspiring example, in the imaginative creations that they came to inform. While the protagonist of David Copperfield-that 'favourite child' among Dickens's novels-comes to think of his childhood self as something which he 'left behind upon the road of life', for Dickens himself, leafing continually through his own back pages, there can be no putting away of childish things.

Technological Economy Feb 26 2021 In this major new collection, leading experts explore the multidisciplinary connections between technology and economy, drawing on new convergences between economic sociology and science and technology studies. Through theoretical and empirical studies, the authors investigate: * economics and economic knowledges as technologies * the economies as socio-technical arrangements * the nature of innovation * the role of technological mediations in representing and performing economies. This revealing book, ideal

for those with an interest in contemporary social theory, interrogates the evidence for the contemporary claims about the emergence of the 'new economy' and 'knowledge-based economies' and sheds new light on the relationship between economy and culture.

Towns in Decline, AD100-1600 Dec 15 2019 Many European towns have experienced loss of population,

degradation of physical structure and profound economic change at least once since the height of the Roman Empire. This volume is an examination of the various causes of these changes, the results which flowed from them and the reasons why some urban centres survived, revived and eventually flourished again while others failed and died. The contributors bring to bear the techniques of history and archaeology, the perspectives of economics, agronomy, medicine, architecture and planning, geography and law, to the study. The result is a synthesis which connects the Decline of the Roman Empire to the effects of the Black Death and the economic transformation of Renaissance Florence.

The 57 Bus Apr 30 2021 One teenager in a skirt. One teenager with a lighter. One moment that changes both of their lives forever. If it weren't for the 57 bus, Sasha and Richard never would have met. Both were high school students from Oakland, California, one of the most diverse cities in the country, but they inhabited different worlds. Sasha, a white teen, lived in the middle-class foothills and attended a small private school. Richard, a black teen, lived in the crime-plagued flatlands and attended a large public one. Each day, their paths overlapped for a mere eight minutes. But one afternoon on the bus ride home from school, a single reckless act left Sasha severely burned, and Richard charged with two hate crimes and facing life imprisonment. The 57 Bus is Dashka Slater's true account of the case that garnered international attention and thrust both teenagers into the spotlight.
