This book is essential reading for anyone responsible for designing or putting workers to task on, or near, large power electrical systems. This is especially relevant where local health and safety law uses a risk-based approach to electrical safety such as in Europe. It is based upon a bedrock of risk management methodology using the 4Ps of Predict, Prevent, Process and Protect to ensure that arc flash hazards are systematically identified, analysed, and prevented from causing harm. Each of the 4Ps are described in detail starting with a quantitative prediction of harm from the arc flash hazard and then a separate chapter on prevention based upon practical measures avoid or minimise harm set against a hierarchy of risk control measures. The chapter on process, policy and procedures gives advice on a methodical approach to creating rules and ensuring competence. Finally, the chapter on protection describes, as a last resort, how personal protective equipment can be selected, used, and maintained. This book is packed with the fruits of the author's vast experience and there is a chapter dedicated to myths and mysteries as well as separate chapters for electrical utilities, duty holders, service providers, contractors, legislation, and data collection. This guide includes travel facts for Austria, the Czech Republic, Germany, Hungary, Poland, Slovakia and Switzerland. Pick a Weekend, Pick a City, and Go! What is it to be Hungarian? What does it feel like? Most Hungarians are convinced that the rest of the world just doesn't get them. They are right. True, much of the world thinks highly of Hungarians--for reasons ranging from their heroism in the 1956 revolution to their genius as mathematicians, physicists, and financiers. But Hungarians do often seem to be living proof of the old joke that Magyars are in fact Martians: they may be situated in the very heart of Europe, but they are equipped with a confounding language, extraterrestrial (albeit endearing) accents, and an unearthly way of thinking. What most Hungarians learn from life about the Magyar mind is now available, for the first time, in this user-friendly guide to what being Hungarian is all about. The Essential Guide to Being Hungarian brings together twelve authors well-versed in the quintessential ingredients of being Hungarian--from the stereotypical Magyar man to the stereotypical Magyar woman, foods to folk customs, livestock to literature, film to philosophy, politics to porcelain, and scientists to sports. In fifty short, highly readable, often witty, sometimes politically incorrect, but always candid articles, the authors demonstrate that being credibly Hungarian--like being French, Polish or Japanese--is largely a matter of carrying around in your head a potpourri of conceptions and preconceptions acquired over the years from your elders, society, school, the streets, and mass media. Compacting this wealth of knowledge into an irresistible little book, The Essential Guide to Being Hungarian is an indispensable reference that will teach you how to be Hungarian, even if you already are. You can count on Rick Steves to tell you what you really need to know when traveling through Europe. With Rick Steves Europe Through

The taxonomy and systematics of European reptiles and amphibians have changed a lot in recent years, yet there is no modern, up-to-date field guide available that comprehensively covers all the species. The last illustrated field guide to European reptiles and amphibians was first published 38 years ago, and remains outdated despite occasional reprints and new editions. This major new field guide addresses this deficiency. A total of 219 species are covered in detail, with a focus on identification and geographical variation; species texts also cover distribution, habitat and behaviour. Superb colour illustrations by talented artist Ilian Velikov depict every species and all major variations, and colour photographs are also included for most species. This groundbreaking new guide will become the definitive field reference for these two groups of animals. It includes: - Over 370 colour artworks and 200 colour photographs - 155 accurate and up-to-date distribution maps - Easy-to-use keys and tables to help with swift species identification Explore ancient ruins and view Renaissance masterpieces in this truly modern Eternal City. This book seeks to aid scholars of all stripes in researching the nations, states, and peoples of the Balkan Peninsula in the Modern Age, presenting a single-source alternative to scholars for launching projects that span the humanities and social sciences. This book includes descriptive keys for identifying every stage of all the species of ticks reported in Europe and northern Africa. It includes descriptive texts on the ecology and prominent features of each species, together with ink illustrations and distribution maps of more than 60 species of hard and soft ticks. The text for each species was prepared by specialists, the illustrations were made especially for this book and the maps were compiled on the basis of more than 40 years of records. This book is the first to offer keys for more than 60 species of ticks (both immature and adult) in the target territory. It also includes supplementary information with bibliographical details for each species. This book is based upon work from COST Action TD1303, supported by COST (European Cooperation in Science and Technology) This edition includes Kaliningrad for the first time, alongside Albania and Macedonia and covers all of Eastern Europe. Regional itineraries offer a mix of classic and less travelled routes. Maps are included throughout The emergence of Europe as a unified trading block has profound implications for those who do business with European countries. European Union Law is written for lawyers and business professionals who require information about the changes that are taking place as a result of the unification process in the member states of the European Union. Unlike other materials on Europe, this book is written primarily for lawyers outside the EU. The book serves three important functions: It provides a comprehensive introduction to European law, law-making institutions and dispute settlement mechanism It presents

European legal regimes for the general areas which are relevant to foreign lawyers, including corporate law, environmental regulation, securities regulation, antitrust law, mergers and acquisitions, licensing, product liability, and dumping. It examines the European regulations of some important specific industries such as broadcasting and telecommunications. The editors and authors of this work are among the most prominent academic and professional authorities in the area of European Law. This book is the single most useful reference tool for those in need of current European Union information. While supplementary protection certificates (SPCs) are governed by the same substantive rules in all Member States of the European Union and the European Economic Area (EEA), they are national intellectual property rights. The formal requirements and procedural practices of the national patent offices granting SPCs still differ significantly, and these divergences can have a substantial impact on the prosecution of SPCs across Europe. This one-of-a-kind handbook provides an in-depth review of SPC law in Europe, covering all substantive and procedural aspects of prosecution, enforcement and invalidation, as well as SPC-related aspects of unfair competition law. Following an overarching European chapter, which addresses general considerations and the relevant European Union law, including the jurisprudence of the Court of Justice (CJEU) and the EFTA Court, this book contains detailed national chapters for all European states that provide SPCs ? i.e., the twenty-seven EU Member States (Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, and Sweden), the EEA/EFTA states Norway and Iceland, as well as the United Kingdom, Switzerland/Liechtenstein, Serbia, Bosnia and Herzegovina, Albania, and North Macedonia. The contributors to this book, all seasoned experts in the field of SPCs in their respective jurisdictions, provide clear and hands-on guidance on the most pertinent SPC-related topics of practical and strategic relevance. The considerably expanded second edition of this handbook offers a comprehensive analysis of European SPC law and practice, covering all European states with SPC systems in detailed national chapters. As such, this book provides invaluable assistance to IP practitioners in devising successful pan-European SPC filing and litigation strategies. Its practice-oriented approach, in combination with a country-by-country format where all chapters follow the same

structure, makes it easy to compare the national practices and the respective national case law of the different European countries. ‘The present work fills a gap and provides, for the first time, an overview of the SPC practice in the EU Member States, which despite the intended harmonization by the respective EU legislation is still decidedly inconsistent in some areas. Altogether, this successful work, with its streamlined structure and clear language that is immediately comprehensible even to non-native speakers, functions not “only” as a source of information for European attorneys, authorities and courts. It also conveys – perhaps not at all intended by the authors – the unique diversity of this European legal regime, which for many exerts a special fascination. The present Practitioner’s Guide can be recommended without reservation and should not be missing in any specialist library.’ – Jürgen Schell, Judge at the German Federal Patent Court, on the first edition of this book. The Guide provides a comprehensive survey of researchers, institutes, university departments, museums, organisations and newsletters in the field of Asian Studies in Europe.
