The management of small water supplies presents a unique challenge globally, in countries at all stages of development. A combination of lack of resources, limited understanding of the risks and poor expertise means that individuals and communities may face serious health risks from these supplies. This is not only due to microbiological contamination, but also from contamination by metals, either due to natural or man-made contamination of the source water or through leaching from plumbing materials due to inadequate conditioning and corrosion inhibition and use of inappropriate materials. This Best Practice Guide aims to share best practice and experience from around the world on a practical level. It looks at general issues relating to small supplies and ways of managing these, adopting a Water Safety Plan approach to deliver sound and lasting improvements to quality. Management techniques and treatment relating to specific metals will be covered, from a theoretical and practical perspective, to deliver a publication that will act as an authoritative guide for all those faced with the problem of ensuring the quality of a small water supply. Varied case-studies will help to illustrate issues and ways in which they have been resolved. Book & CD-ROM. Applying to college can be one of the most stressful times in a student's life. Not only are you faced with the task of finding the perfect school for you, but you also have to find scholarships to be able to go to the school you want. These two intertwining obstacles require a lengthy application and a seemingly perfect essay. The essay topic is crucial to demonstrate your values, creativity, and depth of knowledge, and the writing is important because it reflects your power of persuasion, organisational skills and style. This book will teach you how to write effective applications and essays for college admissions and scholarships, helping shoulder some of the weight of applying. This guide provides you with all the tools you need to complete your application and write a winning essay. You will learn how to choose a topic, keep your focus narrow and personal, edit and revise, tweak essays to use them on various applications, choose your tone and structure, avoid the common pitfalls, and how to overcome writer's block. The guide has sample essays and essay questions, and even examples of the essays specific colleges use. You will find those samples on the companion CD-ROM, along with brainstorming exercises and sample applications. Admissions officers have chimed in with their expertise to provide insider information on how to compose impressive applications and essays for admission and scholarships. Previous edition ISBN: 9781847667687 Acute Exposure Guideline Levels for Selected Airborne Chemicals, Volume 15 identifies, reviews, and interprets relevant toxicologic and other scientific data for ethyl mercaptan, methyl mercaptan, phenyl mercaptan, tert-octyl mercaptan, lewisite, methyl isothiocyanate, and selected monoisocyanates in order to develop acute exposure guideline levels (AEGLs) for these high-priority, acutely toxic chemicals. AEGLs represent threshold exposure limits (exposure levels below which adverse health effects are not likely to occur) for the general public and are applicable to emergency exposures ranging from 10 minutes (min) to 8 h. Three levels--AEGL-1, AEGL-2, and AEGL-3--are developed for each of five exposure periods (10 min, 30 min, 1 h, 4 h, and 8 h) and are distinguished by varying degrees of severity of toxic effects. This report will inform planning, response, and prevention in the community, the workplace, transportation, the military, and the remediation of Superfund sites. This concisely written, abundantly illustrated guide to a wide range of topics in gastrointestinal neoplasia facilitates the evaluation and accurate diagnosis of gastrointestinal neoplasms, both straightforward and challenging. This approachable guide covers the entire tubular GI tract and features more than 600 high quality images. Written and arranged with the busy practicing pathologist in mind, this practical guide includes, for each entity, definitions and terminology, gross and morphologic features, differential diagnoses, useful ancillary tests, staging and grading parameters, and clinical considerations. Beautiful color figures throughout the volume highlight essential histologic features as well as differential diagnoses and potential diagnostic pitfalls. The book is organized into six introductory chapters focused on approaches to neoplasia, followed by 6 organ-specific chapters covering each segment of the GI tract. The final two chapters offer an in-depth discussion of immunohistochemistry and molecular pathology of gastrointestinal neoplasia. This book is a vital reference for practicing pathologists, and with its clear, concise presentation it is also an excellent resource for pathologists in training. Key Features: Provides clear, concise coverage of neoplastic disease across the entire tubular gastrointestinal tract Offers over 600 high-quality images highlighting key differential points and potentially misleading variants Comprehensive tables cover diagnostic features, tumor types, and other crucial data for pathologists About the Authors: Laura W. Lamps, MD, is Professor and Vice-Chair for Academic Affairs, Department of Pathology, University of Arkansas for Medical Sciences, Little Rock, AR Andrew M Bellizzi, MD, is Clinical Associate Professor, Department of Pathology, University of Iowa Hospitals and Clinics, University of Iowa Carver College of Medicine; Co-Director of Immunopathology Laboratory and Co-Director of GI Pathology, Holden Comprehensive Cancer Center, Iowa City, IA In view of the growing presence and popularity of multicore and manycore processors, accelerators, and coprocessors, as well as clusters using such computing devices, the development of efficient parallel applications has become a key challenge to be able to exploit the performance of such systems. This book covers the scope of parallel programming for modern high performance computing systems. It first discusses selected and popular state-of-the-art computing devices and systems available today. These include multicore CPUs, manycore (co)processors, such as Intel Xeon Phi, accelerators, such as GPUs, and clusters, as well as programming models supported on these platforms. It next introduces parallelization through important programming paradigms, such as master-slave, geometric Single Program Multiple Data (SPMD) and divide-and-conquer. The practical and useful elements of the most popular and important APIs for programming parallel HPC systems are discussed, including MPI, OpenMP, Pthreads, CUDA, OpenCL, and OpenACC. It also demonstrates, through selected code listings, how selected APIs can be used to implement important programming paradigms. Furthermore, it shows how the codes can be compiled and executed in a Linux environment. The book also presents hybrid codes that integrate selected APIs for potentially multi-level parallelization and utilization of heterogeneous resources, and it shows how to use modern elements of these APIs. Selected optimization techniques are also included, such as overlapping communication and computations implemented using various APIs. Features: Discusses the popular and currently available computing devices and cluster systems Includes typical paradigms used in parallel programs Explores popular APIs for programming parallel applications Provides code templates that can be used for implementation of paradigms Provides hybrid code examples allowing multi-level parallelization Covers the optimization of parallel programs JEWISH PAPER CUTS: A HISTORY & GUIDE, is a joint publication with Judah L. Contemporary aspects of Burmese life - the changing political situation, the economy, food, architecture, wildlife - are also covered in depth. The Places chapters describe all the sights that should be seen - from the incomparable temples of Bagan, serene Inle Lake, the lost world of Mrauk U and the beaches along the Bay of Bengal to the fascinating cities of Yangon and Mandalay. Detailed, high-quality maps throughout will help you get around and travel tips give you all the essential information for planning a memorable trip, including our independent selection of the best hotels and restaurants. Discover this most exciting of destinations with Insight Guide Myanmar (Burma). The earliest inhabitants called it the island of flowers and Christopher Columbus was so awed by it that he wrote it is the best, most fertile, the softest... the most charming place in the world. You'll understand these accolades when you see Martinique for the first time. The volcanic mass is covered in luxuriant greenery, outlined in soft sand and sprinkled with colorful blooms. Part of the Lesser Antilles, the island is separated from its French sibling, Guadeloupe, by the British island of Dominica. Mont Pelée, a 4,470-foot active volcano, dominates the far northern region and the lofty peaks of the Pitons du Carbet tower over the central plains. Inland, a dense rain forest provides shelter for an array of wild vegetation. To the south, the terrain turns hilly with rounded formations called mornes, and uncommon succulents thrive in the arid soil. Tourists are drawn to the white-sand beaches that line the southern coast washed by the Caribbean to the west; battered by the Atlantic on the east. Most of the island's activity is centered around the bay that cuts deeply into the southwestern shoreline. The bustling capital city of Fort-de-France wraps around the north side of this bay. The most popular resort towns stretch along its south side. Martinique has traditionally been called the Paris of the Antilles and a little piece of France in the Caribbean. Evidence of this truth is everywhere and, although there are other French Caribbean islands, Martinique radiates more of the culture and charm of cosmopolitan Paris. Restaurants serve haute cuisine, stores display haute couture and people speak haute Français. However, in true West Indies fashion, you're just as likely to be served spicy Créole at a beach-side café by an islander wearing madras and speaking thickly-accented patois. Don't let rumors of unfriendly French islanders keep you away from this fabulous vacation spot. Perhaps the locals were a bit aloof in the past, but recently they have taken giant steps toward making Americans feel welcome. Most hotels employ English-speaking staff. Traffic signs are being posted in both French and English. Taxi drivers, tour guides, shopkeepers and restaurant employees are taking language lessons and anxiously looking for occasions to practice their pronunciation. This is a unique and highly detailed guide to the island, with full information on all of the hotels, restaurants and things to see and do. It is excerpted from the 650-page Martinique, Guadeloupe, Dominica & St. Lucia Alive guide. With its glittering pagodas, timeless countryside and gracious people, Myanmar (Burma) is an extraordinarily beautiful destination which has been isolated from the rest of the world for decades. Finally, things are changing and tourism is set to explode in the coming years. This new edition of the Insight Guide Myanmar has been comprehensively overhauled to help inspire and inform, and guide you to the best that this little-known country has to offer. Following on from the inspirational Best Of Myanmar section, the country's rich past and cultural heritage are described in a series of lively essays. Contemporary aspects of Burmese life - the changing political situation, the economy, food, architecture, wildlife - are also covered in depth. The Places chapters have been completely rewritten for this new edition, describing all the sights worth seeing - from the incomparable temples of Bagan, serene Inle Lake, the lost world of Mrauk U and the beaches along the Bay of Bengal to the fascinating cities of Yangon and Mandalay. At the back of the book, the Travel Tips section contains all the practical information you'll need to make the most of your trip, including dozens of carefully selected hotels.
