The UN-led Cyprus peace process is in desperate need of radical transformation. This book makes a notable contribution towards changing the current discourse by empowering the main parties to better value their relationship. By altering goals and perceptions, the authors explore alternative visions for the future of Cyprus, suggesting both realistically feasible and politically challenging ideas. Using an exciting, innovative and multifocal approach, the authors discuss the practical application of specific solutions and explore the radical disagreements of the conflict at both social and political levels. Reflecting on the idea of a 'post-settlement' state of affairs and the prospect of such a reality, chapters illustrate the problems, challenges and political dynamics of Cyprus. The book explores the conceptual approaches to dialogue; reviews Greek, Turkish and Cypriot policies; probes the challenging roles of the UN and EU; canvasses Greek Cypriot and Turkish Cypriot perspectives on the conflict; and, finally, offers dialogical reflections and debates on past and future problems. Allowing open and expressive dialogue, this book will interest those in academic and practitioner roles focused on international politics, conflict resolution and peace studies. It allows for further understanding of the complex perspectives presented in Cyprus that have great relevance in other international settings. Now available in a discounted bundle, buy Ramsbotham, Woodhouse and Miall's bestselling fourth edition of Contemporary Conflict Resolution alongside the new Contemporary Conflict Resolution Reader. The main textbook charts the development of the field, evaluates successes and failures, and assesses key contemporary challenges. Comprehensively revised and updated, it identifies a new pattern of 'transnational conflicts' and argues for a response based on cosmopolitan conflict resolution. The reader offers a rich and illuminating set of readings ranging from the seminal writings of the field's founders to cutting-edge interventions by today's leading exponents and practitioners of conflict resolution. Each part is framed by an editorial introduction so the reader can be used as a core teaching text or as the perfect companion volume to Contemporary Conflict Resolution Fourth Edition. Together the two books provide an engaging and thorough introduction to the full scope of contemporary conflict resolution - a comprehensive resource for all students! For additional support and material, please visit the accompanying website at: <http://www.polity.co.uk/ccr/> After years of relative neglect, culture is finally receiving due recognition as a key factor in the evolution and resolution of conflicts. Unfortunately, however, when theorists and practitioners of conflict resolution speak of culture, they often understand and use it in a bewildering and unhelpful variety of ways. With sophistication and lucidity, "Culture and Conflict Resolution" exposes these shortcomings and proposes an alternative conception in which culture is seen as dynamic and derivative of individual experience. The book explores divergent theories of social conflict and differing strategies that shape the conduct of diplomacy, and examines the role that culture has (and has not) played in conflict resolution. The author is as forceful in critiquing those who would dismiss or diminish culture's relevance as he is trenchant in advocating conflict resolution approaches that make the most productive use of a coherent concept of culture. In a lively style, Avruch challenges both scholars and practitioners not only to develop a clearer understanding of what culture is, but also to take that understanding and incorporate it into more effective conflict resolution processes." Armed conflict may

appear to be in long term decline, but the intractability and destructiveness of contemporary conflicts make conflict resolution as urgent and necessary as ever. The Contemporary Conflict Resolution Reader is the first comprehensive survey of the field as it has evolved over the last fifty years, bringing together the seminal writings of its founders with the cutting-edge interventions of today's leading exponents and practitioners. Drawing on their extensive experience and knowledge of conflict and peace research across the world, the editors have selected a rich and illuminating set of readings that offer a unique and accessible overview of the many different aspects of conflict resolution. The chapters range across prevention, nonviolence, constructive approaches, mediation, negotiation, reconciliation and peace-building. Each one is framed by an editorial introduction and the readings are helpfully broken up into the following sections: reflective pieces, guides to practice, case studies and tools for learning. Covering classical and contemporary ideas, the Reader includes extracts which mark the continued innovation, relevance and dynamism of the field globally. Whether used on its own or as a companion to the hugely popular Contemporary Conflict Resolution, this Reader will be an invaluable resource for students and teachers of peace and conflict research, politics and international relations, as well as practitioners working in the field. While acknowledging the scale of the challenges ahead, this inspiring collection suggests a hopeful and practical vision of the way forward for conflict resolution in the 21st century. Peacebuilding is explained by combining interpretive frameworks (paradigms) that have evolved from the subfields of international relations and comparative politics. Weak or failed states - where no government is in control - are the source of many of the world's most serious problems, from poverty, AIDS and drugs to terrorism. What can be done to help? The problem of weak states and the need for state-building has existed for many years, but it has been urgent since September 11 and Afghanistan and Iraq. The formation of proper public institutions, such as an honest police force, uncorrupted courts, functioning schools and medical services and a strong civil service, is fraught with difficulties. We know how to help with resources, people and technology across borders, but state building requires methods that are not easily transported. The ability to create healthy states from nothing has suddenly risen to the top of the world agenda. State building has become a crucial matter of global security. In this hugely important book, Francis Fukuyama explains the concept of state-building and discusses the problems and causes of state weakness and its national and international effects. Sociologist Elise Boulding offers a collection of essays that emphasize her study of civil society during the second half of the 20th century. She revisits her theme of connection among family, community and government, offering perspectives and advice on how to fuel the process of peace. Das englischsprachige Berghof Handbuch ist das internationale Referenzwerk zum Thema Konflikttransformation. The Berghof Handbuch offers both practitioners and scholars a systematic overview of the state-of-the-art of conflict transformation. The definitive volume on the sources of contemporary conflict and the array of possible responses to it. This book investigates intractable conflicts and their main verbal manifestation - radical disagreement - and explores what can be done when conflict resolution fails. The book identifies agonistic dialogue - dialogue between enemies - as the key to linguistic intractability. It suggests how agonistic dialogue can best be studied, explored, understood and managed even in the most severe political conflicts when negotiation, mediation, problem solving, dialogue for mutual understanding, and discourse ethics are unsuccessful. This approach of viewing radical disagreement as the central topic of analysis and conflict management is a new innovation in this field, and also supplements and enhances existing communicative transformational techniques. It also has wider implications for cognate fields, such as applied ethics, democratic theory, cultural studies and the philosophy of difference. This book will be of great interest to students of conflict resolution, peace and conflict studies, ethnic conflict and International Relations in general. Oliver Ramsbotham is Emeritus Professor of Conflict Resolution at the University of Bradford, UK, Chair of the Oxford Research Group, President of the Conflict Research Society and co-author of Conflict Resolution in Contemporary Conflict. The contributors to this fully revised volume, a team of international experts with both academic and professional experience in the field, provide a broad range of geographical and disciplinary perspectives. Covering theory, research and practice, they analyze the different types of conflict and offer a thorough examination of the influences on conflict - structural, situational, strategic and cultural. Exploring conflict management and resolution, they also discuss negotiation, mediation, peace-keeping and peace-building. This major new textbook analyses the emergent

role of conflict analysis and resolution. Cheldelin, Druckman and Fast are all based at the Institute for Conflict Analysis and Resolution, and are international experts in the field of conflict. Covering theory, research and practice, the authors provide a comprehensive typology of conflict, as well as an in-depth analysis of the structural, strategic, and cultural factors which influence conflict. They explore its management and resolution, paying particular attention to the concepts of negotiation, mediation and peace-building. This is the first integrated survey of conflict resolution since the Cold War, offering an ideal introduction to the subject and an authoritative assessment of its current stage of development. This edited book analyses the relationship between discourse and conflict, exploring both how language may be used to promote conflict and also how it is possible to avoid or mitigate conflict through tactical use of language. Bringing together contributions from both established scholars and emerging voices in the fields of Discourse Analysis and Conflict Studies, it argues for a discourse approach to making sense of conflict and disagreement in the modern world. 'Conflict' is understood here as having a national or global focus and consequences, and includes verbal aggression and hate speech, as well as physical confrontation between political and ethnic groups or states over values, claims to status, power and resources. Themes explored in the volume include the language of conflict, hate speech in online and offline media, and discourse and peace-building, and the chapters examine various national contexts, including Lithuania, Brazil, Belgium, North Macedonia, Sri Lanka, the USA and Afghanistan. The chapters cover conflict-related topics within the fields of Political Science, International Relations, Sociology, Media Studies, and Applied Linguistics, and the book will be of interest to students, researchers and experts in these and related fields, as well as professionals in conflict and peace-building/peace-keeping. Bringing warring parties to the negotiating table is the aim of any peace process. But what happens when those negotiations falter and conflict resolution fails? Is everything lost or are there prospects for meaningful change in even the most intractable of conflicts? In this insightful book, leading scholar-practitioner in conflict resolution Oliver Ramsbotham explores the phenomenon of radical disagreement as the main impediment to negotiation, problem solving and dialogue between conflict parties. Taking as his focus the long-running and seemingly irresolvable conflict between Israel and Palestine, he shows how what is needed in these circumstances is not less radical disagreement, but more. Only by understanding what is blocking the way and by promoting collective strategic engagement within, across and between the groups involved, can deadlock be transformed. Rich in detail and accessibly written, this book introduces a new and as yet relatively unexplored frontier in conflict studies. Its wider application to other phases, levels and war zones holds out rich promise for extending conflict engagement in some of the world's deadliest and most difficult hot spots. Conflict resolution theory has become relevant to the various challenges faced by the United Nations peacekeeping forces as efforts are made to learn from the traumatic and devastating impact of the many civil wars that have erupted in the 1990s. This work analyzes the theory. Peace and Conflict Studies: A Reader is a comprehensive and intensive introduction to the key works in this growing field. Presenting a range of theories, methodologies, and approaches to understanding peace and to transforming conflict, this edited volume contains both classic and cutting-edge contemporary analyses. The text is divided into six general sections: PART I: Peace Studies, Peace Education, and Peace PART II: Peace Theories and Peace Movements PART III: The Meanings and Nature of Conflict PART IV: Conflict Analysis, Transformation, and Prevention PART V: Nonviolent Action and Political Change. PART VI: Building Institutions and Cultures of Peace With an extensive introduction, as well as recommendations for further reading and questions for the classroom, Peace and Conflict Studies: A Reader will be essential reading for students, teachers, and practitioners of peace and conflict studies, and conflict resolution. It is also highly recommended for students of peace operations, peacebuilding, sociology, international security and IR in general. This book is the product of dialogue between a group of leading British Muslim and Christian scholars concerned about the alleged danger to the 'West' of Islamic 'fundamentalism'. It analyses the ethical and legal principles, rooted in both traditions, underlying any use of armed force in the modern world. After chapters on the history, theology and laws of war as seen from both sides, the book applies its conclusions to (a) the 1990-91 Gulf War and (b) the Bosnian Conflict. It concludes that Huntington's 'Clash of Civilisations' thesis is a dangerous myth. Essays by twenty-one renowned contributors from the field of conflict resolution. The Routledge Handbook of Language in Conflict presents a range of linguistic approaches as a means for

examining the nature of communication related to conflict. Divided into four sections, the Handbook critically examines text, interaction, languages and applications of linguistics in situations of conflict. Spanning 30 chapters by a variety of international scholars, this Handbook: includes real-life case studies of conflict and covers conflicts from a wide range of geographical locations at every scale of involvement (from the personal to the international), of every timespan (from the fleeting to the decades-long) and of varying levels of intensity (from the barely articulated to the overtly hostile) sets out the textual and interactional ways in which conflict is engendered and in which people and groups of people can be set against each other considers what linguistic research has brought, and can bring, to the universal aim of minimising the negative effects of outbreaks of conflict wherever and whenever they occur. The Routledge Handbook of Language in Conflict is an essential reference book for students and researchers of language and communication, linguistics, peace studies, international relations and conflict studies. Written by a distinguished scholar, this book explores themes of culture, identity, and power as they relate to conceptions of practice in conflict resolution and peacebuilding. Among the topics covered are ethnic and identity conflicts; culture, relativism and human rights; post-conflict trauma and reconciliation; and modeling varieties of conflict resolution practice. Context and Pretext in Conflict Resolution is the winner of the 2014 Conflict Research Society Book of the Year Prize. Offering an assessment of the theory and practice of conflict resolution in post-Cold War conflicts, this book addresses a number of questions. It explores the nature of contemporary conflict and the development of conflict resolution. Professor Holsti examines the origins of war and the foundations of peace of the last 350 years. An incisive and revealing history of how Yugoslavia plunged into violence in the 1990s Over the past two years, the entire world watched in horror as one of Europe's most stable countries plunged into an orgy of violence and bloodshed that has invoked comparisons to the Holocaust. Aside from empty threats and diplomatic hand wringing, the West has done little to stop the ethnic cleansing, the sieges, and the brutality that has characterized the conflict in the former Yugoslavia. Contrary to common wisdom, the hyper-violent disintegration of the former Yugoslavia is not simply and exclusively the product of inherent and irrational ethnic animosities and centuries of strife. In this engaging book, journalist Christopher Bennett traces the turning point to the 1987 struggle within the Serbian Communist party which was between adherents of a Serb nationalist ideology -embodied by Slobodan Milosevic- and the other Yugoslavs who clung to the vision of a multinational state. As soon as Milosevic gained the upper hand, he ruthlessly purged his rivals and launched a massive campaign of media indoctrination to stir up Serb nationalism. This new nationalism, which has repelled the world since 1991, is primarily Milosevic's creation and not merely the result of historical enmity. As a student at two different Yugoslav universities in the 1980's, Bennett witnessed firsthand many if the critical events which contributed to Yugoslavia's destruction. He renders an incisive and accessible history, covering the period from Tito's dictatorship to the present day. Since the end of the Cold War, conflict prevention and resolution, peacekeeping and peacebuilding have risen to the top of the international agenda. The fourth edition of this hugely popular text explains the key concepts, charts the development of the field, evaluates successes and failures, and assesses the main current challenges and debates in the second decade of the twenty-first century. In response to ongoing changes in the dynamics of global conflict, including the events and consequences of the Arab revolutions, the rise of the self-styled Islamic State, the conflict in Ukraine, and the continued evolution of conflict resolution theory and practice, this edition provides a fresh assessment of the contemporary conflict landscape. Comprehensively updated and illustrated with new case studies, the book identifies a new pattern of transnational conflicts and argues for a response based on cosmopolitan conflict resolution, defined as the promotion of the cosmopolitan values on which the welfare and life hopes of future generations depend. Part I offers a comprehensive survey of the theory and practice of conflict resolution. Part II sets the field within the context of rapid global change and addresses the controversies that have surrounded conflict resolution as it has entered the mainstream. Contemporary Conflict Resolution is essential reading for students of peace and security studies, conflict management and international politics, as well as for those working in non-governmental organizations and think-tanks. Adam Curle's pioneering work as the founding Professor of Peace Studies at Bradford University has been significantly more important to the peace-studies field than is generally understood. Although his ideas were far ahead of his time, they have not been adequately

taught and understood--in part because of the dominance of "realistic" approaches to political science and partly because his writings have not been readily available. This book captures Professor Curle's core contributions in an accessible, edited form so that the breadth of his work can become more available to new students and the next generation of world leaders. A unique feature of Adam Curle's work is his stimulating focus on the inner spiritual and outer dimensions of peace making. Encyclopedia of International Peacekeeping Operations analyzes the broad national, regional, cultural, and international contexts of peacekeeping. Special focus is placed on such contemporary issues as human rights, peacebuilding from below, conflict resolution theory, civilian peacekeeping, gender considerations, and women in peacekeeping. The coverage is enhanced by a chronology, charts, maps, a list of acronyms, an annotated bibliography, and references to key websites. Lists the U.N. offices responsible for peacekeeping operations, training centers, and programs Detailed biographical sketches of important military, civilian, and political figures Includes charts and maps of significant locations across the globe Provides a chronology, annotated bibliography, and references to key websites This book applies approaches in linguistics to analyse the role of news media in conflict and peace processes. Systemic thinking in peacebuilding This is the first comprehensive publication analysing the value added by integrating systemic thinking and peacebuilding theory and practice. Against the background of different case studies, practitioners and scholars frame their various understandings of systemic thinking and present a great variety of systemic concepts, such as systems theory, systemic action research and constellation work. Furthermore, this volume links current discussions about peacebuilding with various systemic discourses. It analyses to what extent systemic thinking and systemic methods are helpful in further developing existing approaches to conflict transformation. In addition, most recent debates in the peacebuilding field, e.g. on liberal peace, the relevance of conflict analysis for strategy planning, bridging the attribution gap, the non-linearity of conflict dynamics, etc., are taken account of. When President Clinton sent Richard Holbrooke to Bosnia as America's chief negotiator in late 1995, he took a gamble that would eventually redefine his presidency. But there was no saying then, at the height of the war, that Holbrooke's mission would succeed. The odds were strongly against it. As passionate as he was controversial, Holbrooke believed that the only way to bring peace to the Balkans was through a complex blend of American leadership, aggressive and creative diplomacy, and a willingness to use force, if necessary, in the cause for peace. This was not a universally popular view. Resistance was fierce within the United Nations and the chronically divided Contact Group, and in Washington, where many argued that the United States should not get more deeply involved. This book is Holbrooke's gripping inside account of his mission, of the decisive months when, belatedly and reluctantly but ultimately decisively, the United States reasserted its moral authority and leadership and ended Europe's worst war in over half a century. To End a War reveals many important new details of how America made this historic decision. What George F. Kennan has called Holbrooke's "heroic efforts" were shaped by the enormous tragedy with which the mission began, when three of his four team members were killed during their first attempt to reach Sarajevo. In Belgrade, Sarajevo, Zagreb, Paris, Athens, and Ankara, and throughout the dramatic roller-coaster ride at Dayton, he tirelessly imposed, cajoled, and threatened in the quest to stop the killing and forge a peace agreement. Holbrooke's portraits of the key actors, from officials in the White House and the Élysée Palace to the leaders in the Balkans, are sharp and unforgiving. His explanation of how the United States was finally forced to intervene breaks important new ground, as does his discussion of the near disaster in the early period of the implementation of the Dayton agreement. To End a War is a brilliant portrayal of high-wire, high-stakes diplomacy in one of the toughest negotiations of modern times. A classic account of the uses and misuses of American power, its lessons go far beyond the boundaries of the Balkans and provide a powerful argument for continued American leadership in the modern world. Picking up where Minorities at Risk left off, Peoples Versus States offers an expanded and updated perspective on ethnic and nationalist conflict throughout the world, as well as efforts to manage it. Ted Gurr surveys the behavior of 275 politically active ethnic groups during the 1990s and pinpoints the factors that encourage the assertion of ethnic identities. Whereas his highly acclaimed 1993 book presented a disturbing picture of spreading ethnic violence, this volume documents a pronounced decline since the early 1990s--a decline attributable, in part at least, to many states abandoning strategies of assimilation and control in favor of policies of pluralism and accommodation.

Nonetheless, Gurr identifies some ninety groups as being at significant risk of conflict and repression in the early 21st century. And he cautions that the emerging global regime of principles and strategies governing relations between communal groups and states is far from perfect or universally effective. This text explains what religious terrorists and religious peacemakers share in common and what causes them to take different paths in fighting injustice. Echoing the Hippocratic oath, a developmental economist and president of the Collaborative for Development Action calls for a creative redesign of international assistance programs to ensure that they become part of the solution and do not reinforce divisions among warring factions. Includes a bibliographic essay. Betts Fetherstone's excellent study points the way forward to a synthesis between conflict management and peacekeeping?' - Hugh Miall, Research Fellow, European Programme, Royal Institute of International Affairs The prevailing over-taxed ad hoc system of peacekeeping does not meet the growing demands posed by the post-Cold War world. This volume argues that peacekeeping needs to be placed on firm conceptual footing directly congruent with its peaceful third party role. The implications of this conceptualisation of peacekeeping for practice are then discussed. Training is cited as a key means of translating conceptual understanding into practice. Without this foundation work, UN has little chance of changing its existing, and largely ineffective, system of conflict management. At a time when peacekeepers are struggling to fulfil increasingly demanding mandates and UN peacekeeping is in danger of losing the distinct character that won it the 1988 Nobel Peace Prize, this important book argues for a clear theoretical redefinition within a conflict resolution framework and examines the practical implications for training. This is a valuable and original contribution to the peacekeeping literature. The question of the legality of humanitarian intervention is, at first blush, a simple one. The Charter of the United Nations clearly prohibits the use of force, with the only exceptions being self-defence and enforcement actions authorized by the Security Council. There are, however, long-standing arguments that a right of unilateral intervention pre-existed the Charter. This book, which won the ASIL Certificate of Merit in 2002, begins with an examination of the genealogy of that right, and arguments that it might have survived the passage of the Charter, either through a loophole in Article 2(4) or as part of customary international law. It has also been argued that certain 'illegitimate' regimes lose the attributes of sovereignty and thereby the protection given by the prohibition of the use of force. None of these arguments is found to have merit, either in principle or in the practice of states. A common justification for a right of unilateral humanitarian intervention concerns the failure of the collective security mechanism created after the Second World War. Chapters 4 and 5, therefore, examine Security Council activism in the 1990s, notable for the plasticity of the circumstances in which the Council was prepared to assert its primary responsibility for international peace and security, and the contingency of its actions on the willingness of states to carry them out. This reduction of the Council's role from substantive to formal partly explains the recourse to unilateralism in that decade, most spectacularly in relation to the situation in Kosovo. Crucially, the book argues that such unilateral enforcement is not a substitute for but the opposite of collective action. Though often presented as the only alternative to inaction, incorporating a 'right' of intervention would lead to more such interventions being undertaken in bad faith, it would be incoherent as a principle, and it would be inimical to the emergence of an international rule of law. This edited book is a new and valuable resource for students, teachers, and practitioners, providing a detailed exploration of how qualitative research can be applied in the field of peace and conflict studies. This book explores considerations and components of designing, conducting, and reporting qualitative research in this field, and also provide exemplars of recent empirical research in peace and conflict studies that employed qualitative methods. Scholars and researchers in peace and conflict studies and peace education face unique challenges in teaching, designing, and conducting qualitative research in these fields. This edited

book discusses tips in designing qualitative studies in this area and for teaching emerging peace researchers best practices of qualitative inquiry. In addition, the book discusses some of the trends, challenges, and opportunities associated with research in peace and conflict studies and peace education. Written at a level appropriate for both graduate students and active researchers, the primary audience for this book is those teaching and learning about the application of qualitative methods to peace and conflict studies, as well as those conducting research in this field. There are currently approximately 230 graduate programs in peace and conflict studies. This book also provides a useful tool for researchers and students in other academic disciplines who are interested in qualitative research. Such disciplines might include education, sociology, criminology, gender studies, psychology, political science, and others. This is the first comprehensive account of humanitarian intervention in contemporary conflict. Offering an assessment of the theory and practice of conflict resolution in post-Cold War conflicts, this book addresses a number of questions. It explores the nature of contemporary conflict and the development of conflict resolution. >
