"Improving Manual Material Handling in Your Workplace" lists the benefits of improving your work tasks. It also contains information on risk factors, types of ergonomic improvements, and effective training and sets out a four-step proactive action plan. The plan helps you identify problems, set priorities, make changes, and follow up. Sections 1 and 2 of "Improvement Options" provide ways to improve lifting, lowering, filling, emptying, or carrying tasks by changing work practices and/or the use of equipment. Guidelines for safer work practices are also included. Section 3 of "Improvement Options" provides ideas for using equipment instead of manually handling individual containers. Guidelines for safer equipment use are also included. For more help the "Resources" section contains additional information on administrative improvements, work assessment tools and comprehensive analysis methods. This section also includes an improvement evaluation tool and a list of professional and trade organizations related to material handling."--Page 6.

The Johnsonville Steam Plant Nov 05 2021 The Johnsonville Steam Plant is the second steam-electric project to be built by TVA. The first-Watts Bar Steam Plant-was built as a part of TVA's first emergency program of the World War II period. Construction of the Johnsonville Steam Plant, with generating units of 125,000-kilowatt capability, began in May 1949. It was the first of seven large steam-electric projects constructed over a span of eight and a half years including the Korean War period. This mammoth building program resulted mainly from the increased power demands of the Atomic Energy Commission and other Federal defense agencies. Additional electric energy was required also by the expanding programs of private industry and the increased needs of commercial and domestic consumers in TVA's service area.
