Risk and the English Novel Feb 20 2020 Taking the cue from the currency of risk in popular and interdisciplinary academic discourse, this book explores the development of the English novel in relation to the emergence and institutionalization of risk, from its origins in probability theory in the late seventeenth century to the global 'risk society' in the twenty-first century. Focussing on 29 novels from Defoe to McEwan, this book argues for the contemporaneity of the rise of risk and the novel and suggests that there is much to gain from reading the risk society from a diachronic, literary-cultural perspective. Tracing changes and continuities, the fictional case studies reveal the human preoccupation with safety and control of the future. They show the struggle with uncertainties and the construction of individual or collective 'logics' of risk, which oscillate between rational calculation and emotion, helplessness and denial, and an enabling or destructive sense of adventure and danger. Advancing the study of risk in fiction beyond the confinement to dystopian disaster narratives, this book shows how topical notions, such as chance and probability, uncertainty and responsibility, fears of decline and transgression, all cluster around risk.

Naval Mine Warfare Oct 10 2021 Sea mines have been important in naval warfare throughout history and continue to be so today. They have caused major damage to naval forces, slowed or stopped naval actions and commercial shipping, and forced the alteration of strategic and tactical plans. The threat posed by sea mines continues, and is increasing, in today's world of inexpensive advanced electronics, nanotechnology, and multiple potential enemies, some of which are difficult to identify. This report assesses the Department of the Navy's capabilities for conducting naval mining and countermining sea operations.
