use of a non-equivalent control group pretest-posttest design. Two sections of Grade 12 STEM with a total of 47 students participated as research respondents, in both the experimental and the control groups. The students answered a 40-item multiple-choice questionnaire as a research instrument. The control group was treated with only pure-text modules and PowerPoint presentation. In contrast, students from the experimental group utilized online interactive resources containing some hyperlinked lectures, video lectures, interactive games, animations, and some simulated demonstrations that were adopted and utilized for Grade 12 STEM learners in General Biology 1. An inventory of more than 2000 data files with principal investigator, title and subject indexes. Text in English and French. Beskrivelse af uddannelsessystemer samt læseplaner og lærebøger i matematik og naturvidenskabelige fag fra 38 lande, som deltager i TIMSS-undersøgelsen Includes "Official program of

the...meeting of the Pennsylvania State Educational Association (sometimes separately paged). Vol. for 1963 includes section Current Australian serials; a subject list. Reviews achievements of the Soviet Union in science and considers legislation to authorize Federal aid programs for science education. Provides information to teachers and students about the diploma examinations in Mathematics 30, Biology 30, Chemistry 30, and Physics 30 that will be administered during January, June, and August 1989. The bulletin explains the design of the examinations and how they will be marked. Provides advice on visiting colleges, handling interviews, filling out applications, selecting colleges to apply to, and determining which to attend. Intelligent Support for Computer Science Education presents the authors' research journey into the effectiveness of human tutoring, with the goal of developing educational technology that can be used to improve introductory Computer Science education at the

undergraduate level. Nowadays, Computer Science education is central to the concerns of society, as attested by the penetration of information technology in all aspects of our lives; consequently, in the last few years interest in Computer Science at all levels of schooling, especially at the college level, has been flourishing. However, introductory concepts in Computer Science such as data structures and recursion are difficult for novices to grasp. Key Features: Includes a comprehensive and succinct overview of the Computer Science education landscape at all levels of education. Provides in-depth analysis of one-on-one human tutoring dialogues in introductory Computer Science at college level. Describes a scalable, plug-in based Intelligent Tutoring System architecture, portable to different topics and pedagogical strategies. Presents systematic, controlled evaluation of different versions of the system in ecologically valid settings (18 actual classes and their laboratory sessions). Provides a

time-series analysis of student behavior when interacting with the system. This book will be of special interest to the Computer Science education community, specifically instructors of introductory courses at the college level, and Advanced Placement (AP) courses at the high school level. Additionally, all the authors' work is relevant to the Educational Technology community, especially to those working in

Intelligent Tutoring Systems, their interfaces, and Educational Data Mining, in particular as applied to human-human pedagogical interactions and to user interaction with educational software. An indexing, abstracting and document delivery service that covers current Canadian report literature of reference value from government and institutional sources.
