*How to Die* Sep 23 2020 Timeless wisdom on death and dying from the celebrated Stoic philosopher Seneca "It takes an entire lifetime to learn how to die," wrote the Roman Stoic philosopher Seneca (c. 4 BC–65 AD). He counseled readers to "study death always," and took his own advice, returning to the subject again and again in all his writings, yet he never treated it in a complete work. How to Die gathers in one volume, for the first time, Seneca's remarkable meditations on death and dying. Edited and translated by James S. Romm, How to Die reveals a provocative thinker and dazzling writer who speaks with a startling frankness about the need to accept death or even, under certain conditions, to seek it out. Seneca believed that life is only a journey toward death and that one must rehearse for death throughout life. Here, he tells us how to practice for death, how to die well, and how to understand the role of a good death in a good life. He stresses the universality of death, its importance as life's final rite of passage, and its ability to liberate us from pain, slavery, or political oppression. Featuring beautifully rendered new translations, How to Die also includes an enlightening introduction, notes, the original Latin texts, and an epilogue presenting Tacitus's description of Seneca's grim suicide.

*How We Reason* Jan 28 2021 Good reasoning can lead to success; bad reasoning can lead to catastrophe. Yet, it's not obvious how we reason, and why we make mistakes - so much of our mental life goes on outside our awareness. In recent years huge strides have been made into developing a scientific understanding of reasoning. This new book by one of the pioneers of the field, Philip Johnson-Laird, looks at the mental processes that underlie our reasoning. It provides the most accessible account yet of the science of reasoning. We can all reason from our childhood onwards - but how? 'How we reason' outlines a bold approach to understanding reasoning. According to this approach, we don't rely on the laws of logic or probability - we reason by thinking about what's possible, we reason by seeing what is common to the possibilities. As the book shows, this approach can answer many of the questions about how we reason, and what causes mistakes in our reasoning that can lead to disasters such as Chernobyl. It shows why our irrational fears may become psychological illnesses, why terrorists develop 'crazy' ideologies, and how we can act in order to improve our reasoning. The book ends by looking at the role of reasoning in three extraordinary case histories: the Wright brothers' use of analogies in inventing their flyer, the cryptanalysts' deductions in breaking the German's Enigma code in World War II, and Dr. John Snow's inductive reasoning in discovering how cholera spread from one person to another. Accessible, stimulating, and controversial, How we Reason presents a bold new approach to understanding one of the most intriguing facets of being human.

*Writing Architecture* Feb 26 2021 For ages, architects have been criticized for speaking an insular language, known to some as "archispeak." Writing Architecture considers the process, methods, and value of architecture writing based on Carter Wiseman’s 30 years of personal experience in writing, editing, and teaching in young architects how to write. This book creatively tackles a problematic issue that Wiseman considers to be a crucial characteristic of successful architecture writing: clarity of thinking and expression. He argues that because we live our lives within the built environment, architecture is the most comprehensive and complex of all art forms. Even brilliantly inspired and complex architectural structures would only amount to misunderstood abstractions without the support and reinforcement of the clear explanation. Written as a primer for both college level students and practitioners, Writing Architecture acknowledges and explores the boundaries between different techniques of architecture writing from myriad perspectives and purposes. A poetic description of the beauty and impact of a bridge will not illuminate the mechanical knowledge housed in the structure, but at the same time, dense architectural theory will not encourage individuals experiencing and supporting the bridge to perceive significance and usefulness in the design. Using excerpts and from writers in different genres and from different historical periods, Wiseman offers a unique and authoritative perspective on comprehensible writing skills needed for success.

*Love People, Use Things* Aug 03 2021 **\*\*THE INSTANT NEW YORK TIMES BESTSELLER\*\*** "The Minimalists show you how to disconnect from our conditioned material state and reconnect to our true essence: love people and use things. This is not a book about how to live with less, but about how to live more deeply and more fully." —Jay Shetty, #1 New York Times bestselling author of Think Like a Monk **AS SEEN ON THE NETFLIX DOCUMENTARIES MINIMALISM & LESS IS NOW** How might your life be better with less? Imagine a life with less: less stuff, less clutter, less stress and debt and discontent—a life with fewer distractions. Now, imagine a life with more: more time, more meaningful relationships, more growth and contribution and contentment—a life of passion, unencumbered by the trappings of the chaotic world around you. What you’re imagining is an intentional life. And to get there, you’ll have to let go of some clutter that’s in the way. In *Love People, Use Things*, Joshua Fields Millburn and Ryan Nicodemus move past simple decluttering to show how minimalism makes room to reevaluate and heal the seven essential relationships in our lives: stuff, truth, self, money, values, creativity, and people. They use their own experiences—and those of the people they have met along the minimalist journey—to provide a template for how to live a fuller, more meaningful life. Because once you have less, you can make room for the right kind of more.

**Plant Propagation by Tissue Culture** Oct 25 2020 Presently, a considerable number of plant species are facing the threat of rapid extinction as they are getting trapped into the circle of the extreme industrialization, deforestation, climate change, global warming as well as unprincipled activities of the human race. Moreover, due to the boom of the population growth, the demand for plants is also increasing too rapidly as it is the only source of energy and nutrition for life on the planet. As a result, the conventional natural growth and development has become unable to cope up with the exceptional rate of expectations. And this is where plant tissue culture comes into action. The in vitro cultivation of plant parts under aseptic or uncontaminated conditions with the aim to achieve complete plants with better growth and health development is referred as "plant tissue culture". In the present world, plant tissue culture has gained huge appreciation because of the ability of coping up with the technological advancement and enabling the diversified processes in the development of the existing plant species, ensuring the prevention of their extinction. Though the history of plant tissue culture is significantly younger than many of the concerns of modern science and technology, it is one of the most important ones as well as one of the most implicated technologies of the present time. The large scale culture of plants to ensure the fulfillment of the continuously rising

demand of the plants not only as a source of nutrient and energy but also as an important element of the improvement of modern civilization has become a must. And so the knowledge of the plant tissue culture techniques has gained enormous importance. The knowledge is not important only because of financial aspects but to ensure the sustainability of life in the planet earth. As the practice of plant tissue culture requires extensive knowledge about the plants at a cellular level, the knowledge acquired by the researches conducted by numerous researchers are not only important for the growth and development of plant species, but also for the initiation of new species and hybridization. The knowledge acquired has become important for many other sectors such as genetics and the researches about the evolution of life in the planet earth. Because of the extraordinary importance of the preservation of the existence of all the plant species, scientists have really put their efforts in developing numerous techniques to conduct plant tissue culture more efficient and accurately. And because of that, the knowledge about plant tissue culture techniques has become really enormous in spite of being practiced for only a century.This book was designed with the aim to let the readers understand the grave importance of plant tissue culture while having sufficient information about the most effective and practiced ways of the plant tissue culture techniques.

**The Summer Wives** Feb 15 2020 “The Summer Wives is an exquisitely rendered novel that tackles two of my favorite topics: love and money. The glorious setting and drama are enriched by Williams’s signature vintage touch. It’s at the top of my picks for the beach this summer.” —Elin Hilderbrand, author of *The Perfect Couple*
New York Times bestselling author Beatriz Williams brings us the blockbuster novel of the season—an electrifying postwar fable of love, class, power, and redemption set among the inhabitants of an island off the New England coast. . . . In the summer of 1951, Miranda Schuyler arrives on elite, secretive Winthrop Island as a schoolgirl from the margins of high society, still reeling from the loss of her father in the Second World War. When her beautiful mother marries Hugh Fisher, whose summer house on Winthrop overlooks the famous lighthouse, Miranda’s catapulted into a heady new world of pedigrees and cocktails, status and swimming pools. Isobel Fisher, Miranda’s new stepsister—all long legs and world-weary bravado, engaged to a wealthy Island scion—is eager to draw Miranda into the arcane customs of Winthrop society. But beneath the island’s patrician surface, there are really two clans: the summer families with their steadfast ways and quiet obsessions, and the working class of Portuguese fishermen and domestic workers who earn their living on the water and in the laundries of the summer houses. Uneasy among Isobel’s privileged friends, Miranda finds herself drawn to Joseph Vargas, whose father keeps the lighthouse with his mysterious wife. In summer, Joseph helps his father in the lobster boats, but in the autumn he returns to Brown University, where he’s determined to make something of himself. Since childhood, Joseph’s enjoyed an intense, complex friendship with Isobel Fisher, and as the summer winds to its end, Miranda’s caught in a catastrophe that will shatter Winthrop’s hard-won tranquility and banish Miranda from the island for nearly two decades. Now, in the landmark summer of 1969, Miranda returns at last, as a renowned Shakespearean actress hiding a terrible heartbreak. On its surface, the Island remains the same—determined to keep the outside world from its shores, fiercely loyal to those who belong. But the formerly powerful Fisher family is a shadow of itself, and Joseph Vargas has recently escaped the prison where he was incarcerated for the murder of Miranda’s stepfather eighteen years earlier. What’s more, Miranda herself is no longer a naïve teenager, and she begins a fierce, inexorable quest for justice for the man she once loved. . . . even if it means uncovering every last one of the secrets that bind together the families of Winthrop Island.

**Between the God of the Prophets and the God of the Philosophers** May 12 2022 The apophatic god of negative theology is the areligious philosophers' preferred god; a god which is remote, detached, and can hardly be an object of adoration or worship, even though it may be an object of wonderment. This is not God according to the Prophets. However, the depiction of God in the theistic traditions has been always charged with anthropomorphism. In this book, I attempt to respond to this charge and explain what Athari (scripturalist) Muslim theologians believe about the Divine attributes and why. Where Do We Get Our Belief From? Our Epistemological Position. The Role of Truthful Reports. The Role of Reason. The Place of Kalâm: Reason as a Tool of Understanding and Armor for Defense. A Typology of Islamic Positions on the Attributes of God. What Do We Believe In? Why Do We Believe in Amodal Affirmation and Why? Do We Believe It Is Important? What Are the Counter Arguments? Reports from the Salaf; Conflict with Reason; The Perfect Does Not Change; The Composite god and Divisibility; Anthropomorphism and Assimilation. Conclusion: Ontologically, no extant being lacks quiddity and attributes. Noumenally, the apophatic god is nonexistent, and phenomenally, it cannot be felt or related to, let alone loved and worshiped. In conclusion of this work, here are my recommendations: -To be deserving of Divine guidance, we need to purify our intentions by true devotion to Allah. We also need to constantly rehabilitate our fi'rah and heal it from the ills of bias (hawa), ulterior motives (aghrâ?), blind imitation (taqleed), habit ('âdah), and conjecture (ghar?). This can only be done through spiritual labor and immersion in the Revelation as understood and practiced by the first community. -We must not subject the Divine instruction to prevalent intellectual or social conventions or transplant xenografts and foreign discourses into our hermeneutical system. We must affirm our belief in the epistemic superiority and self-sufficiency of the Revelation as the ultimate source of truth about the unseen. This will never require us to impugn the office of reason or undercut its value in understanding the Revelation and defending its doctrines. -Our belief in Allah must be rooted in His exoneration from all deficiencies and His absolute incomparability (tanzeeh), and the amodal affirmation (ithbât) of His attributes by which He has described Himself and His Messenger described Him. In our affirmation of the Divine attributes, we should never accept the so-called "necessary concomitants." Inferring from the world of shahâdah (seen) about the world of ghayb (unseen) is both irrational and perilous.-We must be respectful of the imams of this deen, regardless of our agreement or disagreement with them. When we have to disagree, we must continue to love those who spent their lives serving Allah and His cause, and show them the requisite respect. -The public should be spared the confusion of intra-Islamic polemics on creed and taught the basics of 'aqeedah that will provide them with enough guardrails. People should then be uplifted spiritually to want to seek Allah and earn His pleasure. When it comes to the Divine attributes, teachers must prime their understanding with tanzeeh and let the rhetorical strength and richness of the Revelation flow to their hearts, unimpeded by intellectual objections.

**Forensic Investigator** Nov 25 2020 FORENSIC INVESTIGATOR Geoff Bernasconi had always been passionate about his job as a policeman in rural New South Wales and, from the earliest days of his career, went the extra mile, both for victims of crime and for their families. But one night in 1984, he was called to investigate the scene of an horrific car accident in which an entire family had been wiped out – and which it was impossible for him to forget. Geoff’s day-to-day working life became a catalogue of tragedies, some of which involved people close to him, and he found himself spiralling downwards in the grip of post-traumatic stress disorder. When Esther Mckay, fellow forensic investigator and author of the best-selling *Crime Scene*, heard that Geoff has been awarded maximum compensation for his suffering, she knew immediately this was a story that needed to be told. This is a harrowing account of what it is like to work on the front-line of crime and tragedy as a forensic investigator. But it is also the inspiring story of someone who has been exposed to sights and experiences many of us can hardly even imagine, yet has emerged from the darkness to begin his journey to recovery.

*The God Virus* Dec 27 2020 Dr. Darrel Ray, psychologist and lifelong student of religion, discusses religious infection from the inside out. How does guilt play into religious infection? Why is sexual control so important to so many religions? What causes the anxiety and neuroticism around death and dying? How does religion inject itself into so many areas of life, culture, and politics? The author explores this and much more in his book *The God Virus: How Religion Infects Our Lives and Culture*. This second-generation book takes the reader several steps beyond previous offerings and into the realm of the personal and emotional mechanisms that affect anyone who lives in a culture steeped in religion. Examples are used that anyone can relate to and the author gives real-world guidance in how to deal with and respond to people who are religious in our families, and among our friends and coworkers.

*Capitalism* Nov 06 2021 The “courageous and clarion” Booker Prize–winner “continues her analysis and documentation of the disastrous consequences of unchecked global capitalism” (Booklist). From the poisoned rivers, barren wells, and clear-cut forests, to the hundreds of thousands of farmers who have committed suicide to escape punishing debt, to the hundreds of millions of people who live on less than two dollars a day, there are ghosts nearly everywhere you look in India. India is a nation of 1.2 billion, but the country’s one hundred richest people own assets equivalent to one-fourth of India’s gross domestic product. *Capitalism: A Ghost Story* examines the dark side of democracy in contemporary India and shows how the demands of globalized capitalism have subjugated billions of people to the highest and most intense forms of racism and exploitation. “A highly readable and characteristically trenchant mapping of early-twenty-first-century India’s impassioned love affair with money, technology, weaponry and the ‘privatization of everything,’ and—because these must not be impeded no matter what—generous doses of state violence.” —The Nation
“A vehement broadside against capitalism in general and American cultural imperialism in particular. . . . an impassioned manifesto.” —Kirkus Reviews
“Roy’s central concern is the effect on her own country, and she shows how Indian politics have taken on the same model, leading to the ghosts of her book’s title: 250,000 farmers have committed suicide, 800 million impoverished and dispossessed Indians, environmental destruction, colonial-like rule in Kashmir, and brutal treatment of activists and journalists. In this dark tale, Roy gives rays of hope that illuminate cracks in the nightmare she evokes.” —Publishers Weekly
